#### NAVAL PARLEY "BROUGHT TO A STANDSTILL

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

Next Word Lies With Governments of the Three Conferring Nations

CRUISER PROBLEM STUMBLINGBLOCK

Attitude of Great Britain and United States Is Declared by Delegates

GENEVA, Swit., July 6 (A)-The tripartite naval conference, with the United States, Great Britain and Ja-

United States, Great Britain and Japan participating, is at a standstill as far as Geneva is concerned.

The next word lies with the governments in Washington, London and Tokyo. It is they who must help or even direct the solution of the cruiser problem which, if not settled, means the collapse of the conference.

Apparently, Washington must tell London that the new maximum cruiser figures submitted by Hugh S. Gibson embody America's last upward concession, if Washington really means this; and Tokyo must let Downing Street know how Japan regards cruiser limitations.

The situation is that the Ameri-

The situation is that the American delegation has told the British that limitation can only be achieved by keeping cruiser strength within 400,000 tons, which is some 50,000 tons higher than the present American cruiser strength.

tons higher than the present American cruiser strength.

The Americans say in effect: "We do not object to you having 70-odd cruisers if you really need them, but distribute the tonnage so that the total will not create a big excess over your present total tonnage."

Answer of British

mark.

Delegates Meet Privately

Private meetings today between

Hugh S. Gibson, American delegate,
and Viscount Ishii of Japan, and
later between Mr. Gibson and W. C.

Bridgeman, British delegate, failed
to improve the existing critical situation confronting the tripartite naval conference. Lord Cecil, Admiral Sir Frederick

Pield and also Rear Admiral Hilary P. Jones, U. S. N., were present at the Anglo-American parley which, according to reliable report, was rather lively.

It is declared that the British alleged failure properly to recognize

#### LAKES-TO-OCEAN FREIGHT ROUTE TO BE OPENED

All Water Service Between **Detroit and Foreign Ports** Will Operate Soon

DETROIT Mich. July 6 (Special) A regular all-water freight service between Detroit and foreign ports through New York has been inaugurated by the Terminals and Transportation Corporation, which is planning to operate two ships, Twin Ports and Twin Cities on a

frigeration facilities, enables it to carry a wide variety of treight, ranging from dairy and food products to automotive products. Other ships to be placed in operation on this route will be built along similar lines. It is planned to have five other ships maintain a service every other day between Detroit and Duluth. Michigan manufacturers are making shipments to a number of foreign countries over the new route and are promising active support of the new undertaking.

Wreathed with green branches torn off trees.

Flight to Osio Planned

Bernt Balchen is said by the Paris edition of the Chicago Tribune to be planning a flight from the United States to Norway next year. He hopes, according to the paper, to fly from New York to Osio, the Norwagian capital, in the maximum time of 55 hours, flying in a monoplane of the America type and taking four men with him. The distance by

#### **NEW JERSEY PARTIES** SEEK DRY LAW CHANGE

TRENTON, N. J., July 6 (AP)-Both the Republican and Democratic parties in their state conventions held here adopted platforms containing planks dealing with the prohibition greeting to the members of the greeting to the members of the state of the service in the issue. The Democrats went on record organization in France, transmitted as favoring the modification of the Volstead Act to permit the sale of Volstead Act to light wine and beers and the Republicans pledged themselves to institute a referendum on the question of rewising the Volstead Act.

## DECORATION FOR FLIGHT LEADER

French Premier Greets Commander Byrd and His Crew -Ship Being Repaired

PARIS, July 6 (AP)-Premier Poincare pinned the decoration of the Legion of Honor on the breast of Commander Byrd this morning. The ceremony took place at the

Ministry of Finance, in the presence of Sheldon Whitehouse, American Chargé d'Affaires; Captain White, the naval attaché, and H. A. Gibbons, personal representative of Rodman Wanamaker, who sponsored the America's flight across the At-

The visit of Commander Byrd and his three flight companions to the Premier was a brief one, for M. Poin-caré had to yield to the pressure

caré had to yield to the pressure of parliamentary work and hurry away for the opening of the morning session of the Chamber.

The Premier chatted pleasantly for a few minutes with the airmen, congratulating them on their courage, and endurance and the great technical success of their exploit. Then he formally pinned the Legion of Honor Cross on Commander Byrd's breast and gave them the traditional embrace.

Appreciate Welcome

The commander thanked him simciation of the warm-hearted welcome they had been accorded in France and the sympathetic interest with which the French people had followed the flight, especially the last few hours of the early morning bat-tle with the fog.

The aviator's visit to M. Poincaré was not widely heralded. There was

Answer of British

To this the British answer: "We need about 70 cruisers, but if you after a come a continuation of the course of construction will be added to this service as rapidly as required by business demands.

The route is by way of the Detroit River to Lake Erie, across Lake of the ministry when they arrived, but it was an enthusiastic matticulty bring down our total tonnage figures."

Thus this cruiser puzzle is the antiquated problem of the "victous circle." Furthermore, Great Britain says: "Large warships symbolise aggression; small ones, defense. We need only small cruisers to protect our trade routes and food supplies. England simply cannot run the risk of being isolated. And anyway we didn't start this naya' race.

The only practicable solution now in aight seems to be a private agreement with Great Britain that it will continue to build a certain sumber of the small cruisers which it has hitherto regarded as sufficient in the first of the small cruisers which it has hitherto regarded as sufficient in the first of the small cruisers which it has hitherto regarded as sufficient in size for colonial operations, as in sistence upon the right to build 10,000 and 7500-ton vessels would bring the British total near the 600,000-ton mark.

Delegates Reet Privately

He hopes, according to the paper, to fly from New York to Oslo, the Nor-wegian capital, in the maximum time of 55 hours, flying in a mono-plane of the America type and taking four men with him. The distance by

the route he has mapped out over Ireland and Scotland is 4300 miles. The paper says Balchen is seeking financial support for the plan in Norway, the land of his birth, but

This cal labor party would give their sup-

Among various new methods and processes used to increase the supply of motor fuel, Professor Ward mentioned the use of air and gas "The application of political remedies to cure economic and industrial lills is an unsound principle. Instead of being an asset to Labor, it would be an unsurmountable liability." Mr. Frayne declared the intention

of the federation to continue the present policy irrespective of what the trade unions may do in other countries through political action.

#### **BOLIVIA HONORS** AMERICAN EXPERT LA PAZ, Bolivia, July 6 (A)-Prof.

Edwin Kemmerer of Princeton, American fiscal expert, has been honored with a doctor's degree by the University of Bolivia in recognition of services rendered to the Bolivian Government. The Kemmerer financial mission, after having co pleted its task, departed for Arica on oard a special train. A plan for the reorganization of

he national bank, an organic budget law, the reorganization of the Federal Treasury and a general law govthe reform of the customs tariffs, and the revision of the railroad rates were the principal problems studied and settled by the mission.

#### OLD LIABILITY LAW UNCONSTITUTIONAL

The full bench of the Massachu-setts Supreme Court today declared unconstitutional Section 42 of the General Laws, Chapter 166, in a case in which Irene Vigeant brought action against the Postal Telegraph Company. The statute under which Company. The statute under which the suit was brought was nassed in 1851 and imposes an abcolute liability upon a telegraph company irrespective of the company's negligence. While that law was constitutional in 1851 the Court now says because of inventive genius it is become inoperative and creates an unjust discrimination against the Postal Telegraph Company.

# Educators' Leader

New England owes so much as to those dealing in shoes and leather." Mayor Nichols said this morning in opening the Boston Shoe and Leather Mayor Nichols was introduced to

ballroom of the Hotel Statler with the opening of the doors to the dis-plays of the more than 120 manufac-turers by Daniel F. Sullivan, presierchants Association.

The Mayor sounded an ever brighter note for the future of the

shoe industry in New England.
"This section cannot make all the shoes that are made," he said, "but it is true that New England has retained her supremacy in this trade in spite of the fact that it is not as near the center of population as it

have an investment in the shoe in-dustry of between \$250,000,000 and \$300,000,000, requiring over 125,000 skilled operators and manufacturing footwear to the value of more than \$500,000,000 a year."

In response to Mayor Nichols's ad-ress, Mr. Sullivan thanked him for his welcome, and said that as the industry had been founded here, and that Boston was still the shoe and leather center, it was fitting that this to study and revise the taxation

convention and exposition should have been held in Boston.

Immediately after this the New England Shoe Dealers Convention was convened in another of the rooms off the mezzanine floor of the Statler. Mr. Sullivan called first upon Buford H. Jones, president of the 1927 shoe and leather fair, who spoke briefly of the fine co-operation behind the shoe industry in New

ortainty," he said.

Mr. Frayne declared that the fedhad worked with him. Alfred W. Donovan, president of

tailers is the expression of the buy-

ing power of the community that they serve."
"From our industries," he said, "comes the bulk of our income, a large portion of which is sooner or later passed over the retailers' counters passed over the retailers counters in exchange for the goods that the people wish to have and use.
"The question is: What can the New England retailer do to give the

benefit of that specialized knowledge of the market for those products which both manufacturer and retailer are interested in?"

Addresses were made by A. H. Gueting of Philadelphia, president of the National Shoe Retailers Association, and Prof. W. E. Freeland, (Continued on Page 4B, Column 4) Leaders of Shoe-Leather Fair

Reminder Given That Education's Aim Is Not to Escape

IS CHOSEN PRESIDENT

Work but Do Better Work By MARJORIE SHULER

SEATTLE, July 6-A declaration of independence for the schools and the teachers of the United States will be adopted by the sixty-fifth annual convention of the National Education Association as the direct result of recent acts by legislatures, gov-ernors and mayors dictating what shall be taught in schoolrooms, and discharging teachers, superintend-ents and presidents from the service of various municipalities, states and universities.

The teachers are roused by what they regard as a growing tendency on the part of the state legislatures to pass laws compelling or forbid-ding the teaching of particular sub-jects and topics in the public schools. They point to more than a score of subjects which various legislatures subjects which various legislatures require to be taught for a certain number of minutes weekly, and also to the proscribed topics which teachers are forbidden to introduce in their classrooms, and they declare that there is danger of transforming educational institutions into prejudiced centers for the dissemination of special propagades. The special state commission of special propaganda.

stablished by the last Legislature Salary Statement Changed

Legislatures have no disposition to take over the making of the course of study as a whole, recognizing that this requires experience and special training, but, say the teachers, "In response to the agitations and pressures of various social blocs and groups they are doing a far worse thing unintentionally, making a par-tial and inflexible course of study which hampers the schools in their effort to serve wholesomely and in a balanced and proportionate way all the needs of the child and all the

nterests of society."

With regard to their own issues, the teachers will make a slightly different statement this year on the salary question, asking that "salaries be paid to the teachers commensu-rate with the investment which must

clined steadily since the world was and Joseph H. Saturday of two local and state levies have increased and shows little sign of ceasing to dark with two local and shows little sign of ceasing to climb. and shows little sign of ceasing to One of the problems which the Massachusetts.

No candidate was named to oppose Miss Adair. The retiring president, Francis G. Blair of Illinois, goes to the first vice-presidency and the 11 other vice-presidents and the treasurer, Henry Lester Smith of present sources of revenues do to Indiana, will be unopposed.

A survey to show the financial no sition of retired teachers and deter-mine the need of homes for them was proposed by Miss Olive M. Jones of New York City, who made the report for committee on homes for re-tired teachers. In addition to the Olive M. Jones Fund which the asolive M. Jones rund which the association has authorized for this purpose Miss Jones asked for authority to accept 20 gifts of \$1000 each with which to make the survey. Miss Jones recommended that states follow the example of Vermont in setting up their own teachers' home, saying that national funds could be used in time to subsidize these state

Smaller Assembly Proposed

The reduction of the representative assembly which is the voting section of the annual conventions was urged by Dr. Philander P. Claxton of Oklahoma, who proposed that the number be cut to 500 in order to provide for more deliberative action than he considers possible under the present arerative action than he considers possible under the present arrangement of more than twice that number. Dr. Claxton's plan, which will be put to a vote at the 1927 convention in time to become operative, if passed, for the 1928 meeting, proposed a new allocation of voting members on the basis of the percentage of members in state associations, the state delegations to be divided according to the membership in local associations with a few delegates at large in each state from sections where there are not local organizations.

mands:

"1. A greater democratization of education. Our schools are called public schools, but only a small per cent of those who enter go beyond the sixth grade. Public school education has been adapted to the needs of the few, not the many. Abilities, interests, aptitudes and ambitions of more than 60 per cent have been influenced to a very small extent by the schools. A nation like America calls for an educational organization to meet aptitudes of the many, not the few.

"2. New attitudes and ideals on the part of the public as to the func-tion of education. The American people have not yet divorced them-selves from the idea that education is to enable one to escape work, rather than to promote his efficiency to do a better peice of work.

Ald of Laymen Needed

A greater appreciation of the social value of work. This knits people together with common needs and interests, it makes for independence, self-respect, appreciation of values, both individually and socially,

and courage to meet emergencies.

"4. An expanded recognition on
the part of school people of the contribution that can be made by laymen
to the seducational program. The program must be based on actual conditions and needs with which the school man is totally unfamiliar, and

the laymen must come to the rescue."

on this basis. The citizens of Tulsa. Okla., voted to require one course in home economics for all boys in senior high schools. Manual Arts High School, Los Angeles, Calif., has states now offer boys some train-ing in home-making."

Teachers' Colleges Grov "The decision of the American As-ociation of Teachers' Colleges, to sociation of Teachers' Colleges, to assume the responsibility of accrediting, standardising and classifying the several state normal schools and state teachers' colleges, instead of allowing some other voluntary accrediting organization of higher education do this work, has given a recognition to teaching that shows actual and permanent progress," declared Dr. Homer H. Seerley, president of the Iowa State Teachers'

dent of the Iowa State Teach College, Cedar Falls, Ia. Dr. Seerley, continuing, said: is appropriate to call attention to the remarkable popularity of these edu-cational institutions, by their increase in the metholication of spe-cial courses of study for different classes of teachers, by enlarging financial resources in providing well equipped plants for work, well or-ganized libraries and laboratories,

which insures stability of service, efficiency and high grade scholar-ship, recognition by universities and graduate colleges."

Discussion groups were recommended as part of an advisory program in high schools by Miss Jessie E. Gibson of North Central High School, Spokane, Wash., who said, "In our school we have had such groups for six years and have found them to be of the greatest value. All girls, during their first year in school register for a discussion class which meets once a week for a 45-minute period, for two semesters:

may be faced fearlessly and frankly. Youth and maturity meet there on common ground, searching together for those fundamentals of conduct which shall insure the greatest

efforts of the last 10 years to keep the classics in their position of su-premacy on the school curriculum.

Latin Matter Disseminated "Among the newer departures in education is the experiment now being worked out at Teachers College, Columbia University. New York City, where the Service Bureau for Class sical Teachers, now in its fourth year, is very actively fulfilling its mission of serving the interests of the classics in the United States, said Miss Frances E. Sabin, of Teachers College. "The Service Bureau puts into mimeographed or printed form the material contributed by prominent and successful teachers throughout the land. These items, of which there are now about 260, are circulated as loans or sold

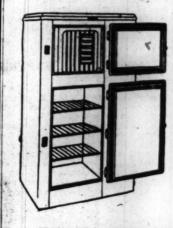

at a nominal price.

"In addition the bureau has issued 30 printed articles under the heading Latin Notes Supplements and many small leaflets. Eight times a year it publishes a pamphlet, the now well-known Latin Notes, the subscribers of which are kept in touch with the progress of classical studies in the country and with the work of the bureau."

#### GENERAL CHEN SURRENDERS TO SOUTHERN ARMY

Defection Paves Way for Nationalist Advance Toward Peking

SHANGHAI, July 6 (P)—The gradual but steady development of the campaign of the southerners against the North China Government is reported in advices from the Shantung front, with the Nationalist leaders expressing belief in an easy advance on Tientsin and Peking.

Railway service between Tsintao on Kiaochow Bay and Tsinanfu.

on Kiaochow Bay and Tsinanfu, capital of the Province of Shantung, has been suspended because of the destruction of a section of track near

Japanese advices say that Gen-eral Chen, commanding the troops between Kiaochow and Kaomi, a stretch of about 20 miles, went over to the Nationalists yesterday, but notified the authorities that although he was surrendering to the south erners, he would guarantee full pro tection for foreign lives and prop-erty. While this apparent defection added little territory to the Nationalist advance, it further paved the way for the execution of the farflung southern campaign, which without doubt is progressing stead-

The Shantung Campaign
Official circles at Nanking, headquarters of the moderate Nationalist
régime, reveal that the southerners the Vellow River from the City of Kaifeng, in the Province of Honan,

to the sea.

From Kaifeng to the west, the northerners have long retreated north of the Yellow River and Marshal Feng Yu-hsiang, who is now co-operating with General Chiang Kai-shek, is established in Honan.

The Shantung campaign involves four columns of troops, three under Chiang Kai-shek, leader of the Nanking Nationalists, and one under Feng Yu-hsiang. Two of Chiang's columns were going through Shan-tung along the seaboard route, one of them having as its objective

#### CRIMINAL CODE IS DRAWN ANEW FOR MICHIGAN

Bill for Simplified Procedure Is Signed by Gov-

PORT HURON, Mich. (Special Correspondence)—Michigan's new criminal code, said to be unique among those of the Union, will become a law on Aug. 14, having passed both houses of the State Legislature. It has been signed by Gov. Fred W. Green.

A respondent may waive trial by jury in case he desires, which has proved to be of value in Maryland. So far as possible, the laws of "Arrest" have been made so simple that police officers can easily familiarize themselves with them. The ball statutes have been strengthened.

Technicalities as to indictment, and the other papers recessary to

The purpose of the framers of the code was to so arrange it that the decisions of the trial judge and the verdict of the jury could only be reversed in case of breach of discretion. This removes from the consideration of the trial judge the apprehension of reversals and the resulting supposed damage to his record. It also permits him to give the jury the benefit of his experience as federal judge do. He may comment on the testimony and character of the witnesses, and assist and guide the jury in their determination. This feature has been very much emphasized as a necessity in modern criminal procedure by Chief Justice Taft and other distinguished lawyers.

The defenses of insanity and, especially, alibit, the latter being a common defense in the larger cities, can no longer be a surprise to the prosehe purpose of the framers of the

no longer be a surprise to the prose-cution. Separate trials of joint offenders is no longer a matter of right, but it is discretionary with

Consent adjournments cannot be had. The cause must be good and the court must enter the cause in its

Discretion as to sentence is left largely with the trial judge. He fixes the minimum and the maximum is governed by the law covering the

Appeals May Be Refused heavier penalties for second and third offenders who commit felonies, number of years to prepare as nearly and a fourth conviction means life imprisonment. Paroles cannot be "The Michigan Commission de-

stand than other bodies.

The new law will provide that an appeal is entirely within the discretion of the Supreme Court. This is designed to keep this court from being overburdened with appeals that are frivolous and for delay. On the other hand, if the trial court follows out the intent of the law, the question as to whether an appeal should or should not be granted can be settled in less than 60 days. The Supreme Court of Michigan does not allow criminal cases to drag on its docket. The commission believes that this statute will discourage frivolous appeals and yet permit any question that should be submitted to the Supreme Court to be determined as speedily as necessary.

Judges Approve Plan

Green.

This is the only State which has prepared and adopted an entirely new code, which did not merely amend axisting laws of criminal procedure, but scrapped existing statutes on criminal procedure and enacted an entire new one.

The code is simple and concise, arranged by chapters, beginning with "Arrest" and going through, chapter by chapter, to the final step, "Judgment and Sentence." It contains several radical changes.

Indictment Made Simple that the code is adequate to test the practicability of the recommendations made by the National Crime Commission and other sociologic bodies who have been advocating a thorough reform of criminal procedure in the various state courts.

The extra session of the Legisla ture of 1926 established a Commis sion on Inquiry into Criminal Pro-cedure. The act provided for three members from the Senate, three from the House and one to be appointed by the then Governor, Alex J. Groes-beck. The following were placed on

Technicalities as to indictment, and the other papers necessary to file in the case, have been eliminated. A simple statement of the offense is all that is necessary. A case cannot be thrown out of court or reversed because of formal technicalities.

Possibly the main feature of the code is that it puts the responsibility for the disposition of the case squarely on the shoulders of the trial judge. Heretofore, in the opinion of some, he has been a sort of glorified umpire. The average trial judge with ordinary discretion should be able to handle any criminal case with dispatch and fairness, the sponsors of the code believe.

Judge May Make Comment

Raimazoo, a physician and experienced legislator; Shirley Stewart of Port Huron, a former prosecuting attorney.

Dennis E. Alward, veteran secretary of the Senate, was appointed secretary, and Miss Jessie A. Paine, clerk of the House Judiciary Committee, was appointed assistant secretary.

Associated with the commission were the following judges: Lewis H. Fead, Circuit Judge of Newbury, president of the judges association; Glenn C. Gillespie, Circuit Judge of Pontiac; Alfred J. Murphy, Circuit Judge of Detroit; Guy A. Miller, Circuit Judge of Detroit; Fred S. E. Lamb, Circuit Judge of Detroit; Fred S. E. Lamb, Circuit Judge of Cadillac; George V. Weimer, Circuit Judge of Charlevolx, and Robert M. Toms of Detroit, prosecuting attorney for Wayne County.

The report and code were drafted in Port Huron by Mr. Stewart, aided

by the assistant secretary. Miss Paine. The commission met regularly, passing on the varied questions raised in connection with the drafting of the code. They consulted with the leading judges and law-rays of the State and investigated. vers of the State, and investigated the work of the National Crime Com-mission, American Institute of Law. New York Crime Commission and other bodies. "At the outset," Mr. Stewart re-

lates, "there was some argument due Probation cannot be granted to a person who has twice been conjected of a felony. It will be interesting to watch this provision work out, the code writers feel, for the reason that violations of the liquor law are felonies under the state law. It is mandatory that the judge inflict mandatory that the judge inflict heavier penalties for second and some other states were taking a some other states were taking a

granted to any but first offenders before the expiration of the minimum sentence without the consent of the sentencing judge.

The question of appeals has excited comment all over the country, as practical as possible. Accord-

ngly the members took a course that no other State seems to have adopted. Their code provides for the repealing of all former laws rather than amendments to the old law, and a new code was presented to the Legislature."

New Governor Won Over

When the code was introduced to the Legislature, there was much speculation as to what reception it would receive. A number of criminal lawyers, in and out of the Legislato be a further complication from the primary campaign that had just been

Former Governor Groesbeck and

used all of his influence to effect its passage.

In the House some criminal lawyers succeeded in getting amendments to the code which would have rendered it of very little value. The Governor's influence together with legislative work on the part of Commissioner Harris and some associates, increased in putting the code back into aimost as satisfactory shape as it was in the beginning. In the Senate the bill passed without any difficulty.

#### CROP REPORTS GOOD ALL OVER CANADA

OTTAWA. Ont., July 6 (A)—Ca-nadian crop conditions at the end of June were generally favorable says a Government June were generally favorable says a Government report. In Manitoba, according to advices from the Provincial Department of Agriculture, crops were sown very late, but were growing rapidly and looking well. Saskatchewan reported crops doing well during the past two weeks, with wheat conditions generally good.

In Alberta the crop was excellent, early sown wheat being in head, and coarse grains growing rapidly. All grains were looking good and promising an excellent yield in British Columbia. Fruit was sizing well. The Ontario Agriculture Department re-

Ontario Agriculture Department re-ported late June days had brought fine growth. Haying was general in the western section of the Province.

CO-OPERATIVES PRAISE WOMEN'S PART IN WORK

Special from Monitor Bureau CHICAGO, July 6-Co-operative agriculture's greatest ally is in the women of the farm, it has been learned in New York State, reported D. J. Carter, editor of the Dairymen's League News, official organ of the Dairymen's League, with 40,000 members, to the American Institute of Co-operation, in session here. "There is among our league lead-

rinere is among our league leau-ers a rapidly growing conviction that one of our very best means of keeping membership interest alive is through our league women and our league homes," he reported.

"In the sections where we have

completed the organization of our women there has been a marked increase in interest and attendance at metings and also a marked increase in community interest. Women are active partners on our farms and why should they not also be in our co-operative marketing work?"

Encouragement of the co-opera-tive movement as given by federal, state and other educational institutions was commended as an important asset, in an address by A. J. McGuire of Minneapolis, general manager of the Land o'Lakes Creammanager of the Land o'Lakes Cream-eries, a service and sales organiza-tion for 400 co-operative creameries of Minesota and surrounding areas and handling cream produced on

and handling cream produced on 80,000 farms.

Farmers in that organization have been co-operating for 30 years in manufacture and marketing of butter so they have an advantage of having knowledge and experience of the generation as a foundation, he showed.

Foreign wool clips will continue to win preference of American clothing manufacturers until there is im-provement in the condition in which

men who grow the sheep, said Matthew C. Walsh, Boston repreentative of the Ohio Woolgrowers'

'American fleeces are sometimes stuffed with tags and other foreign matter," he charged, "which not only increases the shrinkage but causes manufacturers to prefer foreign wools even at higher prices in order Farm-Editor Says Woman

Is Best Ally of Combined Effort

Wools even at higher prices in order to avoid the extra costs of handling. To illustrate, fine Australian wool costs only 53 cents per 100 pounds to sort while American wools range from \$1 to \$1.64 per 100 pounds."

The story of two years' effort by which Philadelphia has obtained numerous benefits from a voluntary, non-political inspection of the milk supply was outlined by C. I. Cohec, director of the Quality Control Department of the Philadelphia Interstate Pairy Council tate Dairy Council,

How Council Was Established Producers first proposed a camthe council was established, Mr Cohec recalled. Buyers were quick to see its advantages, and joined in

easary surpluses.
Says Cheese Doesn't Get Due

An advertising and educational campaign for the cheese industry of America was advocated by M. M. Mortensen, member of the faculty of the Dairy Department at the Iowa State College, Ia., who said that the cheese industry could well afford to "invest a fair sum of money adver-"invest a fair sum of money adver-"invest a fair sum of money adver

"Invest a fair sum of money advertising its product."

"There is no other food product to be had in which nutritive value, wholesomeness and palatability are so well combined," he asserted. "It is unnatural that there should be only limited efforts of manufacturers. Education and advertising. turers. Education and advertising should create a greater demand Very few of our important food products are advertised to such a limited extent as cheese."

The speaker observed that cream

eries and cheese factories of the United States have been improved greatly during the past few years in reference to business methods.

#### TRADE UNION BILL ADVANCES IN LORDS

Railway Men to Amend Rules to Conform to Law

By Wireless from Monitor Bureau via Postal Telegraph from Halifaz LONDON, July 6—The National Union of Railwaymen's delegates at a conference at Carlisle decided, by votes to 10, to amend their organization's rules so as to conform ization's rules so as to contorm to the law as it will be when the Trade Union Reform Bill, now in its final stages, passes. The decision is a vic-

tory for peace.

Alderman W. Dobbie, president of the union, urged defying Parliament by ignoring this bitterly-opposed measure. James H. Thomas, the Union secretary, on the other hand, declared it disastrous for labor to put itself in conflict with the law. A sharp clash thus occurred, but the overwhelming majority which the Thomas policy secured from the alderman's delegates is regarded as alderman's delegates is regarded as a good augury for what may happen in trade unions in other branches of the industry.

The Trade Union Bill passed its second reading in the House of Lords last night, by 152 votes to 26.

Great Britain's reasonable require-

According to all accounts, Mr. Gibdid not wish to do any injustice to Great Britain, but that the American delegation saw little chance of the Senate ratifying a treaty which would bring cruiser strength up to the neighborhood of 600000 tons and prove bait for increased instead of decreased naval construction.

The Japanese are plainly worried over the situation. The private con-"Crucial." "serious" an

"Crucial," "serious" and "preci-ce" were some of the words used connection with the status of the conference as regards cruisers. Great Britain is mentioned as the country on which depends whether there is to be a definite break in the delibera-tions or a continuation toward a treaty on the strength of auxiliary

The question is raised whether original demand for something slightly under 600,000 tons. The American spokesman had indicated that his country would continue to make efforts to have the cruiser

than on the first day?" replied, "The prospects on the first day were not as good as I had hoped, but I will be greatly disappointed if we do not find some way to agree." He again called attention to the peculiar maritime position of the British Empire which laid it open to constant danger from cutting off of food supplies.

Hint at Adjournment There has been a hint that the conference might adjourn upon reaching agreements on the question of destroyers and submarines. leaving the cruiser problem in abey-ance, but it was intimated in American circles that the American dele-gation could see little use in merely settling these two questions. The United States, it was argued, was weak in cruisers, having many antiquated ships, although it had strength in submarines and destroyers. For this reason, it was con-tended, the United States would not

British Attitude Defended

Mr. Bridgeman made a detailed defence of the British attitude as to its naval requirements. He put special emphasis on the statement that while Great Britain's cruise strength at the outbreak of the war in 1914 was 114 cruisers, including those under construction, and at the time of the armistice 120, it had fallen in February, 1927, to 71, this figure including a building program

of nine.

Mr. Bridgeman distributed a document, which declared that in March,
1923, the British Empire was being
outbuilt, because, although Great
Britain since the Armistice had laid down only 11 warships of all types, the four other principal naval powers had laid down a total of 310. As a consequence, continued the state-ment, Great Britain laid down five cruisers in 1924 and Australia two in 1925, and planned others for later

"Due to the special geographical position of the British Empire and the necessity of defending communi-cations vital as regards food supplies," says the statement, "a certain minimum number of cruisers is es-sential. This number translated into eight-inch gun cruisers would rep-resent an immense offensive force; hence we have suggested a limitation siderably less than the limitations now in force and, second, strict limi-tation of the number of eight-inch gun cruisers.

Reducing Gun Power

These proposals by materially reducing the gun power of cruisers would greatly diminish their offen-sive capacities. Incidentally, the economic saving for all nations would be considerable, and thus reduce the burden of naval armaments."

Elaborating the statement, Mr. Bridgeman made one remark, which was interpreted in the sense that the British delegation might be willing to sign an agreement restricted to destroyers and submarines, when he bserved that already a sufficient understanding had been arrived at in the conference to mark a consider-able advance in the line of disarma-

He insisted that the British policy was based on the sound axiom voiced by Hugh S. Gibson in his

routes of the extensive shores of dif-ferent parts of the British Empire. We could not run the risk of being cut off, or risk our defense. Hence we have asked for a number of small vessels rather than large warships with heavy sums which would seem with heavy guns, which would seem more for aggressions that defense." In conclusion Mr. Bridgeman esti-

dent to guide them, the workers of Russia had made so few mistakes in their glgantic attempt to revive the "life of the Nation on a basis of justice and humanity."

In their anxiety to keep the total cruiser tonnage at a low figure, the Americans seemingly have the-support of Japan, who are apparently disturbed over the possibility of raising the cruiser figures to meet the wishes, of the British countribution to the problem raised by President Coolidge. They had nothing to do with any hypothesis regarding naval desires, asptrations and requirements of the Americans seemingly have the-support of Japan, who are apparently disturbed over the possibility of raising the cruiser figures to meet the wishes, of the British.

Mr. Bridgeman's action in convoking a press conference at short notice and winding up his explanation of the British deligation of the British plans by such statements as "if other people are going to build big ones we naturally cannot build small ones," and "I refuse to prophesy, but will be much disappointed myself if we cannot work out an agreement," only served to make President Coolidge's enterprise successful, and thinks that a frank, practical agreement ought to be possible.

Germans, It Is Held, Could Embarrass France in African Lands

PARIS, July 6-French diplomatic circles regard the prospective nomination of Germany to a seat on the Commission of Mandates with mis-giving, but the opposition which expresses itself is not sufficiently vigray A Seasongood proposed the establishment of a \$1,000,000 munici-pally owned airport somewhere along the banks of the Ohio River near the orous to prevent its election by the League of Nations Council in September. It will be an immense stride in the direction of full participation of Germany. In non-Buropean affairs. Membership on the Council gives Germany control over European affairs. Membership on the commission of mandates will give Germany control over African and Asiatic affairs. If Germany is truly placed on a footing of equality with the allies it is impossible to deny it a seat. But the French, with the British, chiefly benefited by the establishment of the system of mandates, which deprived Germany of its old colonies and placed them under mandatory rule. It is felt that Germany will use its position on the commission to criticize the French governorship of former German terral League of Nations Council in Sepplane from Milwaukee went up to second place, patting Harvey Mum-mert's Mercury back to third. Ran-dolph Page, who is piloting the Ham-ilton, leads by 52 points for second place honors. Tonight the tourists

governorship of former German ter-ritories, probably with the eventual hope of receiving a mandate itself. Would Arouse Italy Obviously, it is possible greatly to embarrass France in African lands, French difficulties in Syria too, can be used dangerously against French prestige by an unfriendly member of the commission. If it were logically possible to exclude Germany, doubt-less an attempt would be made, for the rôle which Germany is likely to play in the nature of the case must unpleasant for the mandatory powers. Germany can make itself troublesome until it is mollified by the allocation of a mandate to itself.

Thus it is a step toward the recovery

But, if a mandate is subsequently accorded to Germany, then Italy, which has developed greater colonial ambitions, will be aroused. It is the ambitions, will be aroused. It is the intention of Italy not to permit Germany to have overseas territories until its own need of expansion is satisfied. This diplomatic disadvantage is discussed, and it is asserted that France retains entire freedom, and will act in September without regard to promises. Theoretically France may preserve its liberty. In France may preserve its liberty, but the matter has gone too far for ef-

Makes Refusal Difficult The mandates commission, consulted by the Council of the League, in the augmentation of its members and is ready to receive Germany. It is easy to say that this opinion does not bind the Council, but certainly it

makes a refusal more difficult.

The commission has considered the question technically, not politically. But already Dr. Gustav Stresemann considers the Allies have engaged themselves. The League budget includes anticipatory credits for the admission of Ger-many to the commission. From now onward the problem of mandates ust provoke serious continual de-

The period of complatency in working the mandatory system is believed here to be finished, for with Germany on the commission critical vigilance will be exercised.

WASHINGTON, July 6 (P)—Outside the swirl of politics, William H.

Taft is happier in his daily work than he ever has been before, in or out of office.

As he looks back over his long the center of the room stands a large public service, the only man who has public service, the only man who has been both President and Chief Justice says quite frankly that he does not consider that he was "fitted" for the political arena, and that he would rather be where he is today than in the White House.

He is so well satisfied that he has no intention of leaving the hand. retary of War and later Attorney-General. Near by are pictures of Abraham Lincoln and of various friends, including Elflu Root and President Lowell of Harvard.

As he approached his comparison of the two great offices he has held, Mr. Taft made a passing reference to Theodore Roosevelt. Although he has near him no memento of the years of their association the Chief Justice mentioned without a ruffle in his customary good nature the man who was his stanchest political friend and then his opponent. He related how President Roosevelt had offered him a place on the Supreme bench. At that time Mr. Taft was and he refused the offer. No Appeal in Polities

"I declined because it was not leemed wise at that time, from a he said. "The people wanted me to stay, and I yielded, although it had always been my ambition to serve on the bench. I do not care for politics."
With a smile that rippled into a

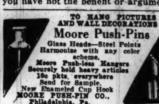

hearty laugh, he added:
"Not that I have no interest in such matters, but I am not fitted

for the hustings and controversy." tion to the highest judicial office in his predecessors, broken personal contacts with friends or with the people generally. He retains a keen interest in current events and reads much; and he does not find himself lonesome for the society of officeseekers and politicians.

called the monastic life of the bench," he continued. "I have most delightful associates in the court, and very pleasant relations with membe noted, exactly defined, but the truth is you are more isolated in the presidency. While a President sees a great many people, he cannot avoid defending himself against too great familiarity. He has got to be reserved and careful.

Advantages of Bench "If one is constituted like an ordiary man, the Presidency, while not requiring the same intellectual labor that attaches to the chief justiceship, s more, trying than work on the bench. The difference between the exactions of the two offices is tirat in work on the bench you have the assistance of your colleagues, who share in the responsibility of the conclusions, the benefit of oral arguments by counsel and of briefs submitted on both sides of the controversy.

"And you have control of your time Possession May Be Had for Song for careful study. In the Presidency you often have to make a decision of a question on the instant or over-night, or in so short a time that the risk of mistake is great, and then you have not the benefit or argument Plenty of Room to Romp and Play in Old-Fashioned

on both sides, often no argument on either, and you cannot always consult your Cabinet.

"Of course, the Presidency is the office that attracts in the sense of Power one in supposed to exercise, and there are those who greatly enjoy constant exerise. But even in the strongest it takes much out of a man, and the strain is felt long after retirement."

Croschool ovakian Diplometers of the property INTERNATIONAL TO COMMON LAW

etirement."
The chief justice added that he now can enjoy a "real vacation, something he could not do while President. He puts aside entirely the

duties of the court during his mer recess, and at his place on Mur-ray Bay, Canada, has a genuine re-spite from work, and makes the most fore starting on my vacation," he explained, "and spend most of my time on my porch overlooking the St. Lawrence River, which is nearly

filed during the recess to enable me to catch up a little before starting upon real work of the court when I get back.'

Opinions Much Revised "I used to write my opinions ou in longhand, but now I find it too confining. Therefore, I dictate and correct and revamp. Writing makes an exact man, as Bacon says; makes that, as to conciseness, it makes no difference whether I write or dictate,

I change and revise so much.
"I have a law clerk who go the records and the briefs. He makes a statement for me of what is in each, and then with that statement before me I read the briefs and make Philippine standpoint, to have a such references to the records as change in the office of Governor," seem necessary. But I always read the briefs so as to know what the claim on both sides is and then I read the opinions of the courts below so I become familiar with the case and know what the issues are. When these petitions for review come before us we know what the cases are about, and whether they present questions we should pass upon Asked what he selected for his vacation reading and for his m of quiet recreation during his busy moments, he replied unhesitatingly that autobiography was his favorite

"I do not care particularly about novels, except by certain authors, he said, and then as an afterthought. "I do not mind detective stories, if can get a good one, and I have read

search for beauty in other ROAD

lands when so much awaits you here? The Milwaukee Road is the only direct way to Gallatin Gateway. A never-to-be-forgotten experience. Electrified for 660 miles—supreme luxury of equipment — dustless — cinderless — cool. No lurching

At Gallatin Gateway Inn motor-coaches of the Yellowstone Park Transportation Company wait to take you direct to Old Faithful over a wonderful road that soars up to 7000 feet by easy gradients through absolutely unspoiled country. Let our travel specialists help plan your trip.

Czechoslovakian Diplomat Discusses American Constitution at Institute

ATHENS, Ga., July 6 (Special)-International law as applied in the United States was discussed by Charles Pergler of Czechosloyakia and Washington, in the round table conference at the Southern Institute of Politics now in progress at the 18 miles across. Free from study and concentration I resent until late in the vacation, when I receive briefs University of Georgia.

Mr Pergler was formerly secretary to the President of Czechoslovakia, the first diplomatic commissioner from that country to the United States and later Minister to

Japan.
In discussing international law as interpreted in the United States, the speaker pointed out its relation to common law and its acceptance by the courts as part of the common law. In the early, history of this country, stated Mr. Pergler, the necessity of fulfilling international one more concise, more economical of space. But it is not as convenient. I work over the opinions so much that, as to conciseness, it makes no difference whether I write or dictate, I change and revise so much.

I work over the opinions so much that, as to conciseness, it makes no with formulating the Constitution. He emphasized the importance of a recognition of international law as

of politics of Princeton University, of politics of Princeton University, gave a talk on the Declaration of Independence as part of the institute program. He said the actual date of the beginning of American independence was July 2 when the document composed by Thomas Jefferson was first submitted for approval. July 4 is the date on which it was finally indorsed, after certain changes in phraseology were

#### SIAMESE MINISTER SPEAKS TO ALLIANCE

WILBRAHAM, Mass., July 6 (Special)—Lieut.-Gen. Phya Vijitavongs, Siamese Minister to the United States, delivered the principal address at the closing conference of the Siamese Alliance, representing students from that land in this cour try, yesterday afternoon. He urged the 40 students present to maintain

high standards of mental and moral

fitness that they might properly in-terpret their country's ideals. The Minister, who with part of his ataff has attended the last four days staff has attended the last four days of the conference, left afterward for Bass Rocks, Gloucester, where he will make his summer headquarters. The sessions, second to be conducted at the academy, were declared successful by Dr. Pyn Muangman, president of the alliance.

#### HOOKSETT BRIDGES WILL BE REPAIRED

Officials of B. & M. Confer With Utilities Board

CONCORD, N. H., July 6 (Special) -Bridges at Hooksett that "went out" at the time of the spring fresh-ets and have not since been used will be repaired at once and trains will be running over them in about three weeks. statement was made by

This statement was made by Dwight S. Brigham, assistant general nanager of the Boston & Maine Rail-load, after a conference in the offices of the Public Service Commission, in which representatives of towns in the Suncook Valley, served by the Suncook Valley Railroad, joined.

The Massachusetts survey was

Repairs will consist largely in replacing beneath the bridges the wooden

recognition of international law as something that is in accord with the fundamentals of the Constitution of Dr. Edward S. Corwin, professor to politics of Princeton University, such expenditures would be justified, though it was not denied that repair-ing the present bridges will be no nore than a temporary solution of the problem at Hooksett.

#### AIR CORPS TRAINING CAMP

The first training camp to be con-lucted by the Army Air Corps in New England for the instruction of Air Corps reserve officers will be opened at Concord, N. H., on Sunday next, Major Longanecker, head of the army air corps in New England, said. Airmen who are members of the 322nd Observation Squadron of the 97th Reserve Division will be in attendance at the camp, which will be of two weeks' duration. Several Bo ton air pilots are among them.

#### Men Found Voting Oftener Than Women

Survey Shows That Father and Sons Ballot Most Regularly

In a recent bulletin of the Massahusetts League of Women Voters, the findings of a national survey of voting habits of Americans made by the national organization of the society are made public. According to the report, the percentage of women who use their ballot is lower than hat of men.

It was also found that the male head of the family was the most con-sistent voter, with the sons next, followed by the daughters and last the mother. The better the education, it is declared, the higher the voting

elections it was shown that a much higher percentage of persons vote at one or more elections than is shown in a survey of a single election. Only

The Massachusetts survey was onducted by Miss Mary P. Webster of Cambridge, assisted by the city committee of the Cambridge League excellence and is on file at the State Office.

#### HARVARD OPENS RECORD SUMMER SCHOOL SESSION

Enrolls 2082 on First Day -Many Advanced Students From West and South

Classes opened this morning a the Harvard summer school with an attendance larger than any previous

The enrollment at the end of the first day of registration, yesterday, reached a total of 2082, which is 230 more than the enrollment on the first day last year. The increase, Philip Putnam Chase, director of the summer school, believes, is due partly to the interest in the new courses offered, especially those in fine arts and business administra-

People who have studied art casually, he says, wish to organize their knowledge, and the Fogg Museum courses offer them something definite in the problems of museum manage-ment. Also a number of public utility executives, men who are mature and experienced in the business world, are attracted to the summer session by the new course in public utility administration, offered by Deane W. Malcott, dean of the School of Business Administration

One Department Smaller

Registration in one department of the summer school has fallen off materially. Only 227 students registered in the physical education department, and it is expected that the total enrollment in the department will be 30 or 40 less than last year. The explanation offered by Harvard officials is that the require ments for a degree in physical education have been made more rigid. Eight summers are now required for such a degree. Moreover, it is believed that the opening of other summer schools has drawn from the prospective Harvard enrollment.

Of the 2082 students who had registered yesterday, less than 250 were regular Harvard students. Most of them came from points in the West

Dr. A. Lawrence Lowell, president of Harvard University, will welcome the summer students Friday evening. July 8, at a reception to be given in the Harvard Union. Mr. and Mrs. Lowell, Director Chase and Mrs. Chase, and Dean and Mrs. Henry W. Holmes will comprise the receiving

A variety of entertainment has been arranged for the students. His-torical excursions will be conducted by university officials through districts of eastern Massachusetts each

Wednesday and Saturday. The places to be visited will include historical spots in Boston, Bunker Hill and old Boston, Lexington and Concord, Wayside Inn, Plymouth and Salem. Industrial excursions in the afternoons will include the Lever Brothers soap fac-tory, the Athenæum Press, Walter M. Lowney Company, the Boston

Fish Pier and the Gillette Safety Razor Company.

Lectures by W. C. Lane, librarian, and L. Heck, assistant librarian, have been announced for tomorrow morning and the following morning in Widener Library.

Guides familiar with the art displays in the Fogg Museum will conduct groups of students through the building, explaining the works of art which it houses.

these morning meetings.

Organ recitals will be given by the choir master each Wednesday eve-ning for a half-hour commencing at 7 o'clock. Soloists of the campus will assist him.

Sporting and athletic facilities of

the university are already in use by the men and women attending the session. Canoes, shells, and wher-ries are available at the Weld Boat Floats for swimming and diving have been set up at the boat

room, or Salle Francaise, is designed especially for them, and its books and magazines will be available to French students during their leis-

#### LIOUOR DESTINATION WAS "NORTH ATLANTIC"

HALIFAX, N. S., July 6 (A)-Testimony presenting a picture of "the American coast" as the mecca for Lunenberg rum schooners was developed at the resumption of the investigation into smuggling which is being conducted by the Royal Cus-

With directors, shareholders and officers of a number of Lunenberg companies which own various vessels on the stand, N. W. Rowell, in behalf of the commission, brought out that fictitious trips by rum schooners to Honduras and Cuba

were arranged for with the destina-tion for which clearance papers were issued virtually never reached.

One witness, however, Alfred T.

O'Leary, customs broker of Halifax, said that the desination generally named in the papers was the "North Atlantic." The evidence given was very similar within its general lines. runners were chartered for a month, ranging from \$2500 to as much as \$4000 a month. The charter according to the evidence was generally arranged through a broker.

RABBINICAL PENSION FUND ASBURY PARK, N. J. (P)—Delegates attending the twenty-seventh annual convention of the Rabbinical Assembly of the Jewish Theological Seminary of America approved a motion by Rabbi Jacob Bosniak of Brooklyn. that they begin a campaign for a ministerial pension fund of \$130,000.

## Opportunities in Foreign Trade Pointed Out for New England AT SPRINGFIELD

Export Statistics Show That Manufactures Find Increasing Market Abroad and That Region's Commodities Are in Lines Much Sought

> classifications amounted to over \$6,000,000 during 1926.
> "The rank of the five leading ex-

port markets for products 'Made in the U. S. A.'— United Kingdom, Can-

ada, Germany, France and Japan— has remained unchanged for several

the ocean by nature, this extreme northeastern portion of our country

is, therefore, most advantageously

situated with respect to the foremost markets of the world.

Large Importer, Too

"Within the past decade there

have been a great many changes in

the world, economic as well as geo-

graphic, and the foreign trade of the

United States in the particular type

of articles manufactured in New

England has been growing more

rapidly than any other group com-

prising the country's exports. Many

New England manufacturers are committed to a constructive and ag-gressive export policy which, almost

without exception, has reaped sub-

stantial rewards.
"In considering imports, we find

that Canada, Japan, British Malaya, United Kingdom and Cuba—named in order of their importance—con-

stitute the five chief supplies of the

nation's imports. New England uses tremendous quantities of foreign

consumed, in one form or another, within our own borders; still others, enter into the domestic business of

the rest of the whole United States.
"New England was an early leader in commerce and industry; has been

playing an important rôle in foreign trade for many generations, and still maintains a place in the van-

guard of the march of progress. The

section is important as an exporter and it is interesting to note that,

mentioned."

commodities are used in our

The increasing efforts of New England manufacturers to enter into trade with other nations, the organization of the New England Export Club and the recent appointment by the Department of Commerce in Washington of several special trade commissioners with diplomatic actually to travel and report tollar preparations, sons, rubber tollar preparations, sons, rubber tollar preparations, sons, rubber land manufacturers to enter into trade with other nations, the organization of the New England Export Club and the recent appointment by the Department of Commerce in Washington of several special trade commissioners with diplomatic standing to travel and report on likely world markets, all point to a channel whereby New England may, in part at least, solve what has been termed by John S. Lawrence, president of the New England Council, the problem of "industrial maturity." toilet preparations, soaps, rubber boots and shoes, electric motors, electric batteries, copper wire, in-cluding insulated wire and cable; copper rods, canned vegetables, printing presses and cotton mill waste, not to mention many others a little further down in the list of leading United States exports. Each

cil, the problem of "industrial maturity."

This problem of "industrial maturity" is apparently somewhat the natural result of the economic evolution of the United States, particularly the rapid rise of industry in the middle West and the West. What Europe has long known, America, and especially New England, is just learning, namely, that foreign trade years na learning, namely, that foreign trade is vitally essential not only to a nation's economic prosperity, but to its stability as well.

Ice Among First Exports

New England's foreign commerce dates back to the romantic days of the eighteenth and nineteenth cencut from the lakes and ponds to re-fresh the peoples in the warmer climes of South America. Intact, too, it arrived after the feat of taking it across the equator! Back came many of them laden with those first cargoes of bananas that have since come to be the basis of an immense and flourishing trade such as those first fruit importers probably never

Export and import statistics are usually looked upon as dry reading, cold and uninteresting facts, Yet behind the report that the United States exported \$4,808,500,000 worth of goods and imported \$4,430,900,000 in 1926 lies a story of pulsating human effort, achievement and prog-ress which would make material of most romantic sort for fiction and scenario writers.

It has well been said that "when America is most prosperous, it buys most from abroad. May not this naturally be also applied to New England commerce?

Three Centuries of Trade

Some interesting data was furnished the writer by Harvey A. Sweetser, New England district man-ager of the Bureau of Foreign and Domestic Commerce, who declared, "For pearly three centuries New England has been engaged in foreign trade. Although the relative importance of New England in the na-tional exchange of goods has changed from time to time, as the center of paper, cotton, steel, tea and many population and the center of industry have slowly moved westward, this section of our country is still a very imposing factor in American imports

and exports."
"According to the latest statistics tory, the Athenæum Press, Walter
M. Lowney Company, the Boston
Fish Pier and the Gillette Safety
Razor Company.

nedicinal and pharmaceutical prep- nesota.

# FRENCH GENERAL

General Passaga Greeted at City Hall-Reception, Banquet Due

SPRINGFIELD, Mass., July 6 (AP)-Mai.-Gen. Fenelon F. G. Passaga, who decorated the regimental colors of the 104th infantry, twenty-sixth division, in France for gallantry at the Battle of Apremont, was the guest today of Springfield, home of the old regiment and also headquarters of the national guard command bearing that number. He will ment later this month at Camp

General Passaga spent the early part of the day in retirement at his hotel, omitting projected visits to Holyoke and Northampton. At noon he was received by F. C. Parker, Mayor, at City Hall, after which he lunched with a committee and paid a visit to the United States Arn Schull, commandant, and was welcomed with an artillery salute fitting his rank.

He will attend late this afternoon a reception at City Hall, and tonight

has remained unchanged for several years past, and the combined purchases of these countries accounted for over half (54 per cent) of our exports during the last calendar year. Of these five leading countries, three (United Kingdom, Germany and France) are considerably nearer New England ports than any other ports in the United States, and a large part of Canada is as near or nearer us Officers Approve Choice

In the United States, and a large part of Canada is as near, or nearer us than other sections of the country. Boston is a little nearer Buenos Aires than is New York, and New England ports are practically on a par with other Atlantic seaports as concerns the accessibility of Latin American markets. Thrust out into the ocean by nature, this extreme for Decoration by France General Passaga, in the United States as a guest of the 104th regiment, is to redecorate the colors of the regiment at Camp Devens on Bastille Day, July 14. It is also said that he is to decorate six officers of the 104th with the ribbon of the Legion of Honor, a fact that has aroused some criticism among members of the regiment in Worcester

and Springfield.

Major Judson Hannigan, former president of the Greater Boston Unit of the 104th Regiment Veteran's Association, said that the probable cause for any feeling was because it is believed that many men who deserve recognition have not recognited. serve recognition have not received it either from our own Government or from others, but that "it is the height of impudence for us to ques tion at this time the choice of France

n bestowing these distinctions.
Brig.-Gen. Charles H. Cole, commander of the brigade of which the 104th was a part, approved and ap-plauded the statement that the men were to be decorated. He said: 'I am overloyed to learn that France through General Passaga, is to pre-sent the Legion of Honor to some of the officers in one of my regiments 104th. Massachusetts wish that the decorations were going to 70 instead of seven but the seven reported are all deserving of recognition."

#### Seashore Vacation Given Club Girls

Days of Outdoor Frolic Begin at Rockport Lodge-New Dormitory Annex Open

Rockport Lodge, the summer vacation place maintained by the Massa-chusetts League of Girls' Clubs in the picturesque fishing village of Rockport on the tip of Cape Ann, is

now in full swing for the summer.

Fifty girls from Boston are now at the camps. Some will stay one week, some two, their places to be taken immediately by other girls from Massachusetts and elsewhere, for the league conducts the club for any girls anywhere, giving first pref-erence, however, to their own. As a rule many have to be denied admit-

Approximately 365 girls spend their vacation at the lodge each summer. The new dormitory annex was opened Saturday. At one end is a large veranda with couch hammocks, with bright colored cushions, where the girls may read or write or watch the sea. Inside are good-

sized single and double bedroe The lodge itself is an old colonial house which has been attractively fitted up for vacation purposes. A large living room has two open fire-places which are used on cold and rainy days and evenings, but at all-possible times the girls are out of deers awaren hosting, beating rooms out doors, swimming, boating, going out early in the morning with the lobster men, taking motorboat trips along the North Shore, stopping off to see the gay watering places or historic states; playing tands or the state of the sta orcnes. Across the bay, at East Gloucester and Eastern Point the bells are plainly heard, whisper-ingly so, if the wind is adverse, beautifully strong and vibrant if it sites; playing tennis or tramping through the countryside, which is as picturesque in its way as the rocky seacoast. In the evenings there are marshmallow and corn roasts and clam bakes on the beach.

The girls are led by Miss Ruth Henderson of Winthrop, an instruc-tor at the Bridgewater Normal School, as recreation director, who teaches them to swim, dive, play tennis and numerous other summer sports, The lodge will be open un-til after Labor Day. At the league's headquarters, 8

Newbury Street, Boston, plans are going forward to enhance the leisure time of the 3500 girls belonging to it throughout the year. They are organized into 31 clubs throughout the State and all the girls earn their own living. The three state secre-taries help the clubs to develop profitable recreational and educational programs, to be self-support-ing in club activities and to help in service to the community.

Reclaiming Metal: A middle-western jewelry manufacturing company reclaims 33000 yearly in precious metals by filtering the water in which its workers wash their hands.

#### HARD COAL VEIN IN NEW ENGLAND WILL BE MINED

New Process to Reduce Ash Content Is Expected to Make It Pay

A well organized exploitation of the large anthracite fields which have long been known to lie in Rhode Island and Massachusetts is to be carried out, and the coal mined in time to be on the New England market this winter, according to an announcement by Arthur D. Little, research chemist and president of Arthur D. Little, Inc., of Cambridge. The development will utilize the The development will utilize the Trent process, it was explained, and is expected to overcome the handicaps which have interfered with the success of several previous efforts to work these deposits.

"It has long been known," declared Dr. Little to a Boston News Bureau representative, "that there are large deposits of super-anthracite in the super-anthracite in th

deposits of super-anthracite in Rhode Island and Massachusetts, from the Narragansett Bay region north to Taunton, Attleboro, Mansfield and thereabouts. The district, proved by government survey to be coal-bearing, is larger than the Scranton region in Pannsylvania. Deposits occur in yelns five to twenty feet thick. feet thick.

Involves Oil Treatment

"The coal, however, is very hard, is high in ash and very low in volatile. Hence it is not practical for use under ordinary firing methods. Mines have been open many schemes to improve the fuel have been attempted, but none has been successful enough to permit commercial production.

"Some time ago the Trent process

was developed to improve similar high-ash coals. It was received with great interest even by governments. More recently it has been extended to include a briquetted production of which is about to be undertaken. Under the Trent method the coal is finely ground, wet with water and then violently agitated while fuel oil is run in. fuel for domestic use, commercia

"The coal particles gather into globules the size of French peas. while the ash is suspended in the water and run off. The coal becomes a putty-like amalgam which is then shaped and baked in the form of small briquettes. The fuel oil is mostly recovered.

mostly recovered.
"The resulting fuel is equal if not coals, for instance, being brought down from 33 per cent to 7 per cent ash content; it ignites readily and burns freely without smoke. I and certain of my associates in the Little company have found it very acceptable for home use.

500-Ton Per Day Plant "It is my understanding that the Osborn Development Company and affiliated interests, controlling the Trent process, are negotiating for erection of a 500-ton per day plant in New England to operate on Rhode Island coal. Fuel from this plant should be in the New England market before the end of the coming winter. A chain of other plants will

later be constructed. "This fuel should come into direct competition with ordinary anthracite. With operation of sufficient plants utilizing the Trent process, New England could eventually satisfy her domestic fuel demands with coal mined within her own borders. Success of the process in New Engomic effects, for it will permit

#### WEALTH DRAFT ADVOCATED BY MR. COPELAND

New York Senator Urges Conscription of Resources in Emergency

NEWBURGH, N. T., July 6 (Special)—Conscription of wealth, manpower and labor, should the United States ever become involved in another war was urged by Royal S Copeland (D.), Senator from New York in an Independence Day address at the headquarters of Washington's Continental Army here. Senator Copeland voiced a strong desire that the United States never be

sire that the United States never be embroiled in another war. On the other hand, should this happen, he held it was the duty of wealth and labor to support the country in its struggles just as much as it was the duty of able-bodied men to bear arms and to submit to conscription.

"There are certain fundamentals this Nation should establish." Senator Copeland said. "The first is, should we have another war, every citizen will be called to the colors, and not only shall there be a conscription of man-power, but there shall be a conscription of wealth and labor of every sort."

Senator Copeland deprecated neglect of United States war veterans. He declared that: "Their reward and recompense should be automatic, and it should be as the grateful and voluntary act of the representatives of a generous and just people.

"A cause of much discontent is the knowledge that the stay-at-homes profited by the war," he added.

#### WORLD UNITY TO BE STUDIED

New Maine Summer School of Politics and Philosophy Is Announced

Utilizing as a background Green Acre, the beautiful estate at Eliot, Me., founded over 30 years ago by Miss Sarah J. Farmer as a non-profit co-operative institution, a new summer school in international relations and modern philosophy, to be known as the Institute of World Unity, will open Aug. 1 with a com-prehensive program of lectures by specialists in the field of education and domestic and international poli-

The institute is designed "to make The institute is designed "to make available to the general public, through the medium of a summer school, those findings of modern information and philosophy which tend to supply a new basis for faith in the possibility of human brotherhood and world co-operation."

The institute is designed somewhat along the lines of such sum-

The institute is designed somewhat along the lines of such summer gatherings as the Williamstown Institute of Politics—though its program is less pretentious—and the Slasconset School of Public Opinion, which has, as yet, a more comprehensive field of subjects and includes the arts, yet it is believed in time that it will take its place as a ranking member of this expanding group.

Advantageous Location Advantageous Location

and camps provide the facilities for study, housing and recreation demanded of such an institute. There manned of such an institute. There is excellent opportunity for both fresh and salt water bathing, boating, tennis, golf and field sports and every effort is made to supply those accompaniments to like which make the period a well-rounded one of both informative and recreational

liam R. Shepherd of Columbia University will discuss "The Relations of the East and West" in a series of six lectures beginning Aug. 29. Professor Shepherd was a delegate to the first Pan-American Conference in Washington in 1915.

Among other lecturers will be Prof. Kirtley F. Mather of Harvard University, and Prof. John Herman Randall Jr. of Columbia University, and Prof. Six lectures of six lectures.

#### BELMONT BRAKE TESTS

Co-operating with the Belmont police, the safety committee of the Boston Automobile Club, A. A. A., started free brake and light tests for the motorists of Belmont and vicinity on Pleasant Street, be-tween Belmont Centre and Lake Street today and brake tests started at 9:30 a.m. and continue until darkness. Light tests will follow. More than 700 autoists had their brakes and lights tested yesterday at Cohasset. The number found to be faulty was high.

## First Six Months of 1927 Registers Building Record

Vigorous June Construction Placed Total for First Half Bahrein Island, Prosperous of Year 4 Per Cent Greater Than for

The greatest volume of construcstruction ever undertaken during
the first six months of any year on
record has been registered since the
opening days of 1927, according to
statistics compiled by the Associated General Contractors of America.

Continuance of operations on a
vigorous scale last month placed
the total for the six-month period
of this year 4 per cent higher than
the figure established during the
corresponding period of 1926, which
held the previous record.

The June volume shows an 8 per
cent increase over operations carried en during May. If even a moderate increase is made during July,
the supremacy of 1927 as the greatest building year on record will be
extended for another month.

To Maintain Pace

Contract has been awarded to
Michael Cashman of Newburyport to
the foundations and sea wall
to the five station and auxiliary
building to be erected on Water
Street, Haverhill, for the City of
Haverhill, at a cost of \$24,300. Architect, Morse & Dickinson of Haverhill.

Holly Hill Development

The Edward T. Harrington Company, which has added to its activities the development of Holly Hill,
Marshfield, reports a very active demand for lots on that estate.

Among the buyers the past week
were Sidney P. Meleney, who purchased two lots containing 23,000
square
feet on Emery Road. A lot on
Holly Road containing 10,000 square
feet was purchased by Marths F.

## ORIENT BUYING AMERICAN CARS

Pearl Center, Good Market for Automobiles

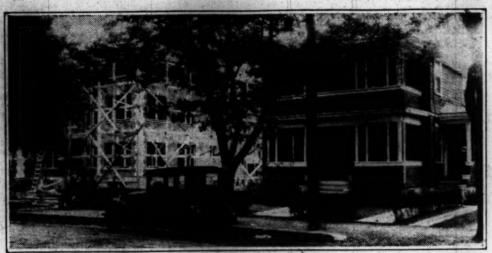

automobiles to increase the volume of their export business, includes a report on the island of Bahrein, a British possession in the Persian Gulf, as a market for American auto-mobiles. The report made public by Harvey A. Sweetser, New England district manager of the bureau, says that Bahrein is not only the center of a rich pearl fishing area, but it is also important as a port for the nearby mainland of Arabla, El Nasa and Nedt Behrain arrouts 75 page cent of Among the buyers the past week were Sidney P. Meleney, who purchased two lots containing 23,000 from the Persian Gulf, which amount to over \$15,000,000.

est building year on record will be extended for another month.

Te Maintain Pace

Strong indications that the present record-breaking pace will be maintained are found in the enormous amount of contracts for future construction work that recently have chased two lots containing 23,000 from the Persian Guil, which amount to over \$15,000,000.

The report declares that Bahrein will continue to increase rapidly as a market for automobiles. In fact, the island has already surpassed in the number of automobiles registered, such better known areas as a Abyssinia, Liberia, Dutch and French

Apartment House Under Construction in Wollaston, Which Marks the Beginning of Unrestricted Building

bullding, the total tax value being \$13,000. This sale was negotiated through Street & Co.

been awarded. The volume of awards made in May was greater than any recorded for that month is any previous year. The total of awards for the first five months of 1927 exceeds by 5 per cent the figure recorded for the corresponding period in 1926.

A scale which places the 1913 as its basis shows the June volume of construction to have reached the 212 level. Index figures for the first five months of this year are: 129, 121, 135, 186, 197.

Corresponding figures for the asame months of 1926 are: 187, 117, 119, 151, 179.

The index figure for volume of contracts awarded during May is 233. The May, 1926, mark was 227.

Beacen Hill Sale

Frederick J. Stimson has conveyed to Jacob Levine, trustee, two properties at 13-15 North Russell Street. #### GRADING LAWS Modern Government Keeps Up End With Society in All Latter-Day Intricacies, Even to Expense HELD FARM AID

the best is a precept that may still hold good—in the opinion of some latter-day authorities.

But in the pursuit of life, liberty and happiness, along with other things, popular government has well kept up its end with the intricacles and complexities of modern society. Granted, then, that the people are governed more than they were a century ago. There being so many more of them, they need more government; undoubtedly they derive more blessings from it, and it is generally conceded they ought to, in view of what they have to pay for it.

And since the people enjoy the manifold beneficences of popular rule and pay accordingly—whether they want to or not—forsooth they should take more interest in it, which is at least one good piece of advice that the politicians proffer about election time. Today the cost of running the government of Massachusetts is greater than the entire expense of running the Federal Government 108 years ago. This year the price will be \$52,504,580.05.

State Shy 500,000 Voters

More than 4,000,000 inhabitants of the State represent the fountainhead of their governmental system. Of these, 1,356,853 were on the voting lists at the state election in 1926. It is estimated there are 500,000 persons eligible to vote who do not take the trouble to be registered. So it is the voters, or rather the majority of those that go to the polls, who the voters, or rather the majority of those that go to the polls, who choose certain state officers. After that the machinery of executive and administrative activities spreads out in a mase of departments, commissions and boards.

sions and boards.

Six major state officers are selected by the electorate—Governor, Lieutenant-Governor, Secretary of State, Treasurer and Receiver-General, State Auditor and Attorney-General. They are constitutional officers, directly responsible to the people, each at the head of his own department, with the Governor, as chief executive, having a measure of

department, with the Governor, as chief executive, having a measure of authority over all.

Up to 1920 all the administrative activities were conducted by boards and commissions—more than 100 of them. The Constitutional Conventional Conven greater concentration and cohesive-ness. It proposed an amendment that the administrative business be limited to not more than 20 departments, to be brought about by the end of 1920. This, along with other constitutional amendments submitted, was ratified by the voters in 1918.

Plan Revamped in 1919 This decree of the Constitution was

> partment and a director at the head of each division thereof and appointments thereto were made late that year by President Coolidge, who was

partment, made up of the Governor, Lieutenant-Governor and Executive Council. When the departments were reorganized in 1919 it was found there were several odds and ends left over. They were squeezed into a group technically designated as serving directly under the Governor and council. They include the State Library, Art Commission, Armory Commission, Superintendent of Buildings, Commission on State Aid and Pensions and Commission on Uniform State Legislation. Later the Commission on Administration and Finance was organized and linked up with the Executive Department.

Of the numerous units in the gov-ernmental plan, one of which the public probably knows the least is the Executive Council. That may be the Executive Council. That may be partly due to the fact that all its deliberations are behind closed doors. Calvin Coolidge once characterized the council as "extra eyes and ears for the Governor." In the funda-mental law it says the Governor shall "hold and keep a council for the ordering and directing of the afably to the Constitution and the laws

Council an Important Cog There are eight members of the council, elected from as many coun-cilor districts. By virtue of his office, council, elected to districts. By virtue of his office, the Lieutenant-Governor is a voting member of the council. Contrary to a popular impression, he does not preside over the council sessions, clude 10 normal schools, the agricultural college, three textile schools, the nautical school, five welfare institutions, five correctional institutions, five correctional institutions, five correctional institutions.

Only two other states have a gov-ernor's council—Maine and New Hampshire. Which suggests a ques-This decree of the Constitution was a large order, but the Legislature accomplished it a year ahead of time. The entire administrative scheme was revamped by the Legislature of 1919, with provision for a commissioner at the head of each new dealong without such an institution, it uses 100 barrels of flour a day; why could not Massachusetts. chinery. It serves as a check on the entire executive and administrative

All appointments by the Governor have to be confirmed by the council. In other states the Federal Government's system of confirmation by the Senate is the rule. No pardon or commutation or even a reprieve may be issued by the Governor without approval of the council, although in modern times there is not an instance on record of where action by

modern times there is not an instance on record of where action by the Governor in such cases has not been upheld by the council.

Watchdog of Treasury

Over the finances of state departments the council holds what amounts to a veto power. All departmental expenses come to it for scrutiny. They come in the form of warrants from the treasurer's office, at the rate of about 100 a week. Checks for payments of accounts cannot be issued from the treasury department until the warrants have been approved by the council and signed by the Governor.

When the Legislature establishes special commissions or committees, appropriating money for their activity of the council and suffer to hold the local markets the farmers of New England must grade and pack their farm products in the same careful manner. Local farmers have one big advantage over the western man. They are close to the market. If their products are marketed well they First, we have the Executive De-

All state contracts require the council's approval. It has general supervision of all public institutions, of which it makes an annual inspec tion. Following each state election, the council canvasses the vote, which takes about a month, after which the results are officially announced. Wednesday is the day of the council's weekly meetings.

State Run on Business Lines Massachusetts has been one of the first states to attempt to introduce the efficiency of private business methods in the conduct of public business. That has been the main talking point for the last seven years. Reduction of the State debt, so that a pay-as-you-go basis finally may be attained; lessening of the burden of taxation, of which a special study is about to be made; yet in no way abridging the many activities for the public welfare—these are goals in the general direction of which the

#### ENDEAVORERS OUTLINE PLAN TO HELP DRYS

To Use Political Influence -Adopt Resolutions for Guidance

CLEVELAND; O., July 6 (Special) -The 12,000 Christian Endeavorers ow in the midst of their thirtyinternational convention is Cleveland continue to express their letermination to combat the spirit of lawlessness that has resulted

tivated a critical attitude toward the Eighteenth Amendment. Most stu-dents are idealists. They expect clear-cut results. The slow evolu-tionary steps by which American akes many impatient and antag-nistic. Perhaps prohibition is not complishing utopian results but, nce human beings have been

Special from Monitor Bureau

ORD CORNWALLIS, Deputy

Grand Master, addressing a

masons recently, referred to the

efforts that have been made in re-cent years by the Grand Lodge to cement the friendships between Eng-

General Purposes, and the Grand Secretary, Sir Colville Smith.

It would be his privilege, Lord

panied by other officers of Grand

wenforcement:

"Resolved: That the thirty-first ternational convention of Christon, Endeavor with its 4,000,000 tembers, many of whom are about become first voters, puts itself quarely and irrevocably on record the confine strict enforcement of all squarely and irrevocably on record as favoring strict enforcement of all law and especially in favor of the manitenance of the Constitution including the Eighteenth Amendment. We note with deep distress a flagrant disposition on the part of many people to disregard and violate such laws as do not suit their own personal habits or convenience. We regard such an attitude as most tragic because it undermines the very foundation of our national being and welfare.

trom an unpatriotic disregard for the Eighteenth Amendment. Practically every session of the convention takes on an aspect of an old-fashioned prohibition raily.

Carleton M. Sherwood, Boston, extension secretary, United Society of Christian Endeavor, in an address before a forum group on "Christian Endeavor Society would exercise its influence politically for the preservation of constitutional prohibition."

Itions show that there is a steady diminution in the amount of drinking on campuses and that an overshead wing proportion of student body of America is not engaged in law breaking. As Endeavores we not only avow ourselves in hearty sympathy with the Constitution, in the amount of drinking on campuses and that an overshead wing proportion of student body of America is not engaged in law breaking. As Endeavorers we not only avow ourselves in hearty because it is the law, but because we believe it is the best law yet framed.

"We also believe that self-supporting legislation, both national, state and local, ought to buttress the Constitution and we are constitution and we have a self-supporting the constitution and we have a self-supporting the constitution and we have a self-supporting the constitution in the amount of drinking on campuses and that an overshead with the constitution in the amount of drinking on campuses and that an overshead with the constitution in the amount of drinking on campuses and that an overshead with the constitution in the amount of drinking on campuses and that an overshead with the constitution in the amount of drinking on campuses and that an overshead with the constitution in the amount of drinking on campuses and that an overshead with the constitution in the amount of drinking on campuses and that an overshead with the constitution in the amount of drinking on campuses and that an overshead with the constitution in the amount of drinking the campuses and that an overshead with the constitution in the amount of drinking the campuse and that an overshead with the constitution

we also believe that self-supporting legislation, both national, state and local, ought to buttress the Constitution and we profess ourselves as unalterably opposed to any amendments of the so-called Volter a plenary session of the conference of the oft-repeated assertion that undergraduates of American shatitutions of learning and the conference of the oft-repeated assertion that undergraduates of American shatitutions of learning and the conference of the oft-repeated assertion that undergraduates of American shatitutions of learning and the conference of the conference of the oft-repeated assertion that undergraduates of American shatitutions of learning and the conference of the conf

at undergraduates of American stitutions of learning were colators of the prohibition law.

Defends Students From Attacks
"It has been too often assumed," is said, "that students have cul-

supporting it.
"We call upon the great political parties for an unhesitating and clear-cut declaration of their principles upon the matter of Constitu-tional prohibition, and for the nomi-nation of such men as can be trusted makes many impatient and antagonistic. Perhaps prohibition is not
accomplishing utopian results but,
since human beings have been
drinking for some 300 centuries, the
custom has become somewhat firmly
rooted and it is going to take considerably more than seven years
successfully to stamp out drinking.

The convention, amid great enthusiasm and by unanimous vote,

mation of such men as can be trusted
to support the Constitution and its
accompanying statutory legislation.

Simeon D. Fess (R.), Senator
from Ohio, anticipated the work to
be done by Congress during forthcoming session. He named flood-relifet, tax-reduction, and adjustment of
foreign relations as three major concernts of the American people at the
present time.

Business and the Newark Public Library

proved their inestimable value. The collection has come to include city directories of over 40,000 cities and towns in the United States, 1250 telephone directories, 800 trade and 300 foreign directories. From these books three-quarters of the queries asked the branch are answered. As a reault of the experience thus gained, the branch librarians published another book: "Mailing List Directory and Classified Index to Trade Directories," McGraw-Hill, 1924. In it some 1500 directories, covering 1300 trades, are analyzed as to content in one straight alphabetical list.

If all the directories in the branch were purchased, the cost would be exorbitant. But there has been developed a system of exchange which

reloped a system of exchange which veloped a system of exchange which saves a great deal of money. Each purchaser of a Newark directory finds in his book a letter from the business branch, requesting that if he has no use for his old directory he send it to the branch, in order that it may be used to exchange for those of other cities. This letter, which is inserted by the publishers, But John Cotton Dana, Newark's librarian, does not go on that theory which is inserted by the publishers, brings a gratifying response. Thus the branch has always the next to the latest directory to exchange with other cities, through the medium of libraries or chambers of commerce. Trade directories are in large part presented free, on request to the publishers. of the city a business branch, which it is possible to gather. That the effort to supply "help wanted" has been successful is indicated by the fact lishers. Those which must be paid for are bought at a good discount, as firms are quick to see the adver-tising value of a library such as this Service Comes First

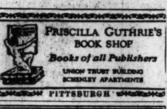

Although information from directories is constantly being conied at entirely to business—the first public library building so used.

The history of the branch dates from 1904, when Mr. Dans placed some city directories, along with books of general reading, in a little the branch, still in the making of mailing lists especially it is desirable to have the directories for use in the usiness house rather than at the branch. To meet this situation, those directories most in demand are ob-tained in duplicate. The original or reference copy is never lent, but the duplicates may be borrowed, the latest editions for a period of not library was so eagerly used as to prove the potential value of an ade-quate collection of business books. At more than seven days at a charge of 25 cents a day. This rate is sufficient that time, however, special libraries were not developed, and problems had to be solved as best they could without the help of previous expeto pay for the extra copies necessary to provide the service. That the privilege is appreciated is shown by the advantage taken of it.

In all ways the branch has tried to simplify library routine to make to simplify library routine to make service quickly available to the business man. Borrowers' cards are issued from the main library. But on request, if an address can be verified and a telephone call to the main library proves that the applicant has no charges against him, books are lent informally pending the action of the registration department. Out-of-town borrowers often make use of "company cards" often make use of "company cards"
—cards issued to a firm on request
of one of its officials, and available for use to any employees whom the official designates. These cards, like individual cards, may be used in any library branch in the city. For the individual who does not qualify the individual who does not qualify for personal or for company cards, there is the privilege of borrowing on payment of a deposit equivalent to the value of the material borrowed. This deposit is refunded in full on return of the material, too, in the new three-story building has been planned to serve the busy man. The first floor contains material to answer the questions of the hurried

keys. The second floor is for the resider with more time. Here may be consuited, at comfortable leisure if desired, books, magazines, pamphlets and clippings on every branch of modern business. As yet only these two floors are needed for public use. To insure maximum usefulness, the library has printed a booklet for distribution among Newark's business men, to acquaint them—if they do not already knew—with the branch's resources, and to familiarize them with the new duarters. With the clearly drawn diagrams of the two floors, there need be no waste of time on the part of the borrower in finding his way about.

#### Air Traffic Notes

LONDON-The premier award for irmanship for the year 1926, the Britannia Challenge Trophy, has been awarded to Sir Alan Cobham for his flight to Australia and back. He won this trophy in 1925 for his flight to Cape Town and back.

The Duchess of Bedford recently The Duchess of Bedford recently completed a three weeks' flying holiday during which she covered some 5500 miles. Using a Moth airplane, she flew from her home at Woburn Abbey to places in France, Spain, Italy and northern Africa. When at Madrid during this flight her pilot, Capt. C. D. Barnard, gave a display of airchatics before King Alfonso and the Prince of Wales, who was visiting there at the time.

An amusing event on the program of a recent Hampshire air meeting was a pageant of travel relay race Contested in five stages, the comwas a pageant of travel relay race. Contested in five stages, the com-petitors consisted of pedestrians, horesmen, cyclists, motorists and air pilots. The pedestrian was garbed as a cave man, the horseman as a highwayman in Victorian dress, and the cyclist on an ancient type of ma-

The Southampton flying boat is now being made with a metal hull. This is some 500 pounds lighter than wood, and a wooden hull gradually absorbs up to 400 pounds weight of water, so the total saving in weight

Mrs. S. C. Eliott Lynn, the first British woman pilot, with Lady Bailey, recently established a light airplane altitude record. They reached a height of 16,000 feet in just over two and one-half hours in a Moth airplane with Cirrus 85 h.p.

Leslie Hamilton, a private owner pilot, has been running a successful service on the Riviera. He found many people glad to go from Cannes to Monte Carlo in 20 minutes instead of the three and one-half hours by train. His Vickers-Viking Amphibian can take four passengers and 100 lbs. of luggage.

The lighting of Croydon airdrome is being reinforced by a giant night-landing flood light of 4,000,000 candle power. This will be mounted on a tractor and will form a complete unit with its generating plant. It will light up the whole airdrome with an effect of 75 per cent daylight.

#### The Birch-Bark Canoe Moved "Like a Yellow Leaf" on the Water

Building of This Graceful and Practical Craft by Ingenious Indians of North American Tribes

Winnipeg, Manitobe
Special Correspondence
To THE unrecorded past, long before the coming of the white man, the birch-bark cance was the Indian's means of travel over the waterways of North America. Gradually, with the passing of the years, it underwent a course of evolution in appearance and usefulness, but that it was strays a convenient craft is evidenced from the readmess with which the early French and British traders and explorers took to it to aid them over the great distances, particularly on Canada's exceedingly numerous waterways.

The birch cance was part of the red man himself, for it was ditted and adapted to his requirements and environment just as a garment fits the person. It was his means of travel by water and it was his protection at night when he turned it over, "under the wide and starry sky," by the river's bank, and slept under it. The Eskime had his kyak ahf the Indian also possessed his degout, but neither of these could in any way match the birch-bark cance for grace and utility.

Sole Means of Gravel

ADELAIDE, S. Aust. (Special folk songs, is of common occurrence ords of songs at the ceremonies of the native tribes have been obtained by Prof. E. Harbid Davies of the Adelaide Conservatorium, who recently undertook an expedition into central Australia.

It is amaxing, Professor Davies said, to find in these primeval people, so isolated from the rest of the human family for untold ages, a widespread and varied art of song. Crude it may be at times, but very definitely organized, and practiced in connection, with the numerous ceremonials of an elaborate totemic system. The songs throw some fight upon the origins of music, making authentic much that has been hitherto speculative. This shows beyond doubt that instinctive human utterance is not confined to speech.

#### Windjammer Wins With Azor Second

Captures the Brooklyn Challenge Cup in 299-Mile Yacht Race

NEW YORK, July 6—Commodore Edward Crabbe of the Toms River Yacht Club is the winner of the Brooklyn Challenge Cup for 1977, according to the announcement of the racing committee of the New Rochelle Yacht Club. Commodore Crabbe's schooner Windjammer won the race with an elapsed and corrected time of 58h. 48m. 58s. Asor, owned by C. A. Marsiand, winner of the trophy last year, was second with an elapsed time of 58h. 48m. 58s. Asor, owned by C. A. Marsiand, winner of the trophy last year, was second with an elapsed time of 50h. 35m. 38s., and a corrected time of 60h. 43s.

Yankee Girl, owned by G. W. Warren, won third place with an elapsed time of 60h. 10m. 8s., while G. E. Smith's Northern Light finished fourth with an elapsed time of 76h. 50m. 39s., and a corrected time of 76h. 50m. 39s., and a corrected time of 70h. 34m. 3s. Owing to the fact that the Northern Light has a rating measurement below the minimum of 24 feet for this rate, it was out of the race for the trophy.

olympic hockey champions of 1924, won from Gordon Taylor Jr. of York Downs.

Two other matches, both international affairs, produced close finishes with the United States players defeating Canadians in each. M. J. McCarthy of Brooklyn defeated W. M. Hodgson of Montreal, I up, after setting the pace most of the way and Paul H. Hyde of Buffalo, a semifinalist last year, eliminated A. Carson McWilliams of Calgary, 2 and 1.

W. H. Gardner of Buffalo staged a great comeback in the afternoon after being 2 down to H. T. Borthwick at the end of the first 18 holes. Gardner squared the match at the twenty-seventh hole and won 4 and 2.

The remainder of the matches were comparatively easy for the winners who in practically every case were in front at the end of the morning round and either increased their lead in the afternoon or held it until their respective matches ran out.

C. R. Somerville of London, the defending champion, had the best score of the day, a 69 in the morning, which gave him a lead of eight holes and he won by the greatest margin of the day, 9 and 8, over N. Thompson Jr. of Hamilton, the Ontario junior champion, who in a number of holes had to get birdies for halves.

Of the 16 players in the second round five are from the United States, the same number from Toronto and two each from Hamilton, London and Montreal. There are two sets of brothers among the 16, D. D. and A. C. Carrick of Scarboro, and Frank and Stanley Thompson, the former of Chicago and the latter of Toronto. Four relax and the latter of Toronto. Four relax and frank Thompson are former winners still in the running. Mississauga and Scarboro of Toronto. Royal Montreal and London Hunt. Somerville, D. D. Carrick and Frank Thompson are former winners still in the running. The summary:

#### **CREENWICH WINS** AT MEADOWBROOK

Defeats Rockaway in Hemp stead Cup Tourney

won the game by it.

Two good reasons why the Yankees lead the American League and Pitts-burgh leads the National League are that each team has three men among the first five leading batters of their respective league.

In defeating Teronto, Tuesday, three Reading batters made home runs in such Reading batters and the Ibis and Andiamo not leading their assistance.

After yesterday's close finish between the Pamparo and Typhoon, which the former won by two seconds, the forties ware very keen for today's race and were of course right on the

leads the American League batters and has the most hits and the most home runs.

Groh, former veteran third baseman of the Glants, is back in the major leagues. He played his first game Monday with the Pittsburgh Pirates, filling in at third base, left vacant by Traynor for the time being.

The three bases Sisler stôle against Detroit in the 18-to-7 victory Tuesday raised the St. Louis first baseman's total to 15. He also made three hits in six times up for an average of .500.

An odd feature of Monday's double-headers in the National League is that four teams were successful in winning both their games. Glants, Braves, Pittsburgh and Chicago were the winners defeating Brooklyn, Philadelphia, St. Louis and Cincinnati, respectively.

If home runs and the possibility of a barrage of hits are not the important attractions that bring forth the large attendance, how can one account for the 72,41 paid attendance to the Yankees see Stadium, Monday? The Yankees are genuine sluggers and Ruth and Gehrig are the top-notch home-run hitters.

The Yankees accoring a total of 33 run to 3 for Washington in Monday's doubleheader must have been a real set back to Senator fans.

Baseball games have been postponed and held up times without number, but a new means of holding up the game has developed. Salem and Lewiston of the New English League held up their contest for nearly half an hour, because the sun shons directly in the vision of the batters.

The American athletes are guests of the Eritish Sportsman's Club at a luncheon at the, Savoy Hotel and went sight-seeing in London this afternoon, later going to Cambridge, collegians.

Tomorrow afternoon, the Americans will have tea with Lord David Burghley, the noted British hurdler, at if the international rule had produced a safe boat at least, one that can stand punishment and I believe is very fast, "commented the president of the North American Yacht Racing Union last night.

One of the most interesting classes on the Eastern cruise this year is that for auxiliaries, salling on their respective ratings. Four of these cruising type of yacht started in today's are the produced at the president class, in making the announcement of the Santors, in the weak The Cularies of the Santors, in making t

spective ratings. Four of these cruising type of yaght started in today's
run, and others are expected to join
later in the week. The quartet consisted of Demarest Lloyd's ketch Angelica which halls from Washington,
George DeBiois' yawi Halcyon which
claims Manchester, Mass., as her port,
Charles Loe Andrews' schooner Cit. Charles Lee Andrews schooner Curlew, an Alden boat and Richard Whitney's Seawanhaka schooner Nokomis
loaned to him for the cruise by Commodore Stewart of the Cythera and
painted a bright blue. In this class
the Curlew is the scratch boat, but the
allowances to the other three are not
large. It is expected that the Malabar VIII with the Gibson Island cup
in her prize locker will arrive from
the Chesapeake on Friday and make
the run to Provincetown, while the
schooner Sachem which halls from
Wiscasset will also join the class.

The fleet will turn back from Portland tomorrow for the first time in
the memory of the oldest yachtsmen
and race along the southwestern Maine
coast to the Isles of Shoals. ViceCommodore Milliken, who is in command of the squadron, claims to have
made the necessary weather arrangements, so that a continuation of the
sports is expected. The summary:

Wills return to the United States soon to defend America's tennis laurels on their own soil. Miss Wills will bring the Wimbledon champion-plonship and Tilden better than an even break with his three French rivals.

Tilden's showing in his lone agrument with the "Musketeers"—Henri-Cochet, J. Rene Lacoste and Jean Borotra—was three victories and two defeats. He defeated all three and only Lacoste and Cochet succeeded in beating him. He also defeated Jacques B. Brugnon, a fourth great French player.

In the first part of his crusade, Tilden scored a clean sweep, defeating the masses of the recent visit of British ethics of over 70 mp.h. when his clacoste, Borotra and Cochet. Later he did not fare as well, losing Lacoste, Borotra and Cochet in the masses and the men's united States of the clink of the second man. The following review of Tilden's one-man battle against three or four how he still can be reckoned in on the Wimbledon semifinals, after eliminating Brugnon.

#### COUNCIL FAVORS METHODS TO AID EMPIRE'S UNITY

in the methods of recruitment for the various colonial services. There has been an increase of 60 per cent in the requirements of the colonies in personnel since the war, but owing in part to the low scale of pay and lack of prospects, it has been found difficult to attract enough candidates of the right type. In future, it is intended to give selected applicants an extended course of training at Oxford or Cambridge and to try to ascertain probable staff requirements at least five years in advance so as to insure regularity of supply.

Regarding mechanical traction a permanent council is proposed to investigate the matter, particularly with a view to the requirements of been an increase of 60 per cent in

investigate the matter, particularly with a view to the requirements of undeveloped tropical territories.

Since the tropical forests consist mainly of hard woods, the problem of selecting those varieties which could serve as substitutes for soft woods is to be undertaken. The quinquennial imperial Forestry Conference will be held at Melbourne in 1928, when this and other points are to be thoroughly levestigated. Meanwhile the Colonial Conference emphasized the necessity of further phasized the necessity of further research work in forestry-in particular such subjects as forestry en-gineering, the relations of forests to water supply and the protection of hill slopes from grosion.

Surveys by Air Civil air development in the Colonies was advocated by the conference, especially in connection with forest surveys, forest fire prevention, and as a means of keeping in touch with outlying districts where land and water communications were long or difficult. Thus in the interior of undeveloped territories, like British undeveloped territories, like British Guiana and British Honduras, jour-neys "st present requiring many hours to accomplish could be per-

formed by airplane in as many min-Special attention is to be given to special attention is to be given to the preparation of landing grounds. It was, however, decided that as regards aerial surveys, while the speed was very much faster than ground surveying, "the cost of the former method, including the expense of the initial ground control and final mapping was seldom less except for very large areas. The only fully developed application of air fully developed air fully develo survey had so far been in rather flat country. . . . The height of the hills should not be more than 10 per cent of the height at which the airplane flies." On the other hand, it was suggested that airplanes might not supposed to interfere in ordinary internal affairs. advantageously be used in locating oyster beds in the Ceylon pearl fisheries area.

Uses for Wireless

External affairs are conducted by the Government of India. The states are also dependent upon Delhi and Simla, where questions of outside communications and overseas trade come in, as most of them are cut off completely from access to the sea by intervening British areas. With regard to wireless, the colonies are to investigate the possibility of instituting local radiocasting services "as a contribution toward the amenities of life in isolated communities." This, it was stated, has already been done at Colombo, Ceylon, and satisfactory reception has been recorded as far away as the Himalayas, Burma and the Malay States.

As to films, the conference decided that "wherever practicable," legislation should be introduced in the various colonies "to prohibit blind booking and to limit advance booking, further to require every renter to take a minimum proportion of British films and every exhibitor to show a minimum proportion in his theater," on the lines of the British legislation on this subject. The With regard to wireless, the col-

legislation on this subject. The term "British film" as defined in this bill has an "Empire-wide meaning," it was emphasized. The British film industry is to be encouraged to "im-prove its distributing organization

in the colonies," and steps are to be taken "to insure that no displays unsuitable for, or offensive to, people of native races are permitted."

Legislative Procedure

The conference also investigated the question of procedure is colonial legislatures, concluding that, "aithough the substitution as president of a freely elected speaker might be possible at some future date, it was essential in present circumstances that the Governor should retain his position as president and continue to participate in the proceedings of the Legislative Council."

The greater use of ceremonial was urged, and "the use of a regal emblem in the shape of a mace, and the opening of proceedings with prevers "would" to was these with prevers "would" to see the present electrified rail-visitor to Switzerland return ways, constitutes a real romance of the feeling of home-coming search service capable of covering the farming problems of all the profit of the colonial dependencies is expected to be not the farming problems of all the profit of the colonial dependencies is expected to the colonial office Conference which will be held in London in October.

Later two German emissaries to Rome, Kaiser and Konige traversed the Gotthard, accompanied by an entire regiment or soldiery. Not long after this no less a person than Benvenuto Cellini visited the Gotthard and neighboring peaks, protected by a coat of armor as well as a large bodyguard of soldiery. The ascension of these peaks, which did not begin in earnest however, until late. begin in earnest, however, until late in the eighteenth century, was really the first stage in Swiss mountain travel, for it indicated little by little the possibility of roads and later of railways through, over and around. When, in 1786, Jacques Balmat, a chamois hunter of Chamonix, and a chamois hunter of Chamonix, and a companion made the initial ascent of Mt. Blanc he revealed the possibility, long since realized, of the world-known mountain railway there. The Jungfrau, to whose summit today an even more wonderful railway almost attains, was first ascended in 1811, and Moute Reas highest of the Aland Monte Rosa, highest of the Al-pine peaks, in 1855. The Matterhorn, pine peaks, in 1855. The Matterhorn, now made comparatively easy by well-marked trails, assisting wire ropes and huts, took a high toil from its first assistants, but it was accomplished many times soon afterward, while Miss Annie Peck of Providence, R. I., one of the pioneer woman Alpinists, climbed it in 1903.

Earliest Alpine Highway The earliest of the Alpine high-ways was that over the Simplon, in ways was that over the Simplon, in 1640, the route being between Berne and Sion and the primitive coach being equipped with heavy drag-chains to check its descent on the precipitous southern slopes. For two centuries, until the building of a similar highway over the Gotthard Pass, the Simplon route was the only coach route from Switzerland into Italy. Half a century before, however an adventurous Englishman named Greville had achieved the considerable feat of driving a coach and pair over the Gotthard, along the rough mule trail which was then the only path. The first really safe and serviceable highway across the Alps was that built by Napoleon in 1805.

tains, and which guards the visitor to Switzerland against overcharges.
By 1880 the number of hotels and
pensions in Switzerland had increased to 1000, but today there are
more than 4000 with an invested

the large Portuguese settlements of whose activities, progress and gen-eral life little is known in Portugal. Among the interesting reports has sent back to Portugal is that an interview with Conde Alte, who has occupied the post of Portuguese Minister at Washington for over 30 years. The Minister said that the grants, naturally affects the develop ment of the Portuguese colonies America. "The Portuguese should sent to their own possessions, especially in Africa," he declared, "In the United States the settlers soon naturalize themselves, their children frequent American schools, the mother tongue is soon forgotten and

after two or three generations Portu-gal has become a remote memory.

"In former times the United States wrapped in their flag all strangers who asked their aid and dug their soil. In spite of this, the successive hundreds of Portuguese who came from the Azores kept the memory of Portugal green. The immigration laws changed all that. In 20 years Portugal will be almost forgotten by the people who settled and pros-pered in America.

Colonists Needed for Africa

"Let us therefore," said the Portu-guese Minister," embrace the oppor-tunity to guide the footsteps of our emigrants to our African colonies. Bismark once said, 'England has col-onies and colonists: France has colonies and no colonists; Germany has colonists and no colonies, and I now add: Portugal has colonies but her colonists are not in her colonies." He further assured Senhor Ferros that an American expert on emigration questions, if commissioned would devise means to people in less than five years "the deserted Portu-guese colonies." "No one will take them from us if they are properly colonized; but it is a pressing ques-

tion and our only defense is to do so. If there is no one in Portugal who knows how to resolve the emi gration problem, let them apply to America, the country and home of specialists in all matters. Portugal's Need of Experts

place among the pleasure-grounds of the world.

When Rudolf, in 1273, was the head of the first Swiss Empire, there was a foot-trail over the Simplon. Years later when, in 1401, Adam de Usk sought to cross the Alps on a pligrimage to Rome, he had himself carried blindfolded over the Gotthard Pass, partly because he would not gaze upon the awesome aspects of nature there revealed.

Benvenute Cellin's Journey
Later two German emissaries to Rome, Kaiser and Konige traversed the Gotthard, accompanied by an entired the Gotthard, accompanied by an entired the Gotthard, accompanied by an entired among the pleasure-grounds of the world the portugal was going to make a fresh start, and it would facilitate financial operations and foreign loans. It was thus that Poland and Hungary restored their finances."

FOR COLONISTS

Covery of Portugal can only be brought about by experts of some other nationality, American by preference. Their points of view could be modified and adapted by Portuguese committees appointed tor this send. "Only foreigners can justly appreciate the situation, from an outside point of view," he said. "This action on the part of the Portuguese Government would prove to the world that Portugal was going to make a fresh start, and it would facilitate financial operations and foreign loans. It was thus that Poland and Hungary restored their finances."

## BOOK REVIEWS AND LITERARY NEWS

## Burke in High Relief

A SCHOLARLY and well-written life of so great an orator, author and statesman as Edmund Burke is always to be well-comed and Bertram Newman's book justifies this description.

There were three events in British history in which Burke played an especially prominent part. One was that of the American War of Independence. In this Burke appeared as a powerful advocate for negotiation as opposed to force. Speaking on April 19, 1774, he used the memorable words:

on April 19, 1774, he used the memorable words:

"Again and again revert to your own principles, seek peace and ensue it—leave America, if she has taxable matter in her, to tax herself. I am not here going into the distinction of rights, not attempting to mark their boundaries, I do not enter into these metaphysical distinctions; I hate the very sound of them."

Mr. Newman says of Burke, "He saw the English revenue officers about their hated task in Boston harbor; he saw the sharp-faced lawyers arguing in the American provincial assemblies, and saw, as it were, the best part of the British Empire slipping away for the sake of a formula."

Demanded Peace

Demanded Peace

When news of the Boston resistance reached England, Burke made a great speech in Parliament. The first part of it Mr. Newman describes as a close and vigorous argument as to the expediency of repealing the tea duty; the second part was a his-tory of the whole subject of American taxation from 1766 to 1774 in which Burke assumed the right and the expediency of the trade laws as a matter of course. On the other hand he declared that peace must

be secured.

A little later we find him amplify-A little later we and aim ampilying this demand. "The proposition," Burke said, "is peace. Not peace through the medium of war; not peace to be hunted through the labyrinth of intricate and endless negotiation; not peace to arise out of universal discord, fomented from principle in all parts of the Empire; t peace to depend on the juridical determination of perplexing questions; or the precise marking the shadowy boundaries of a complex government. It is simply peace; simple in its natural course and in

simple in its natural course and in its ordinary haunts. It is peace sought in the spirit of peace and laid in principles purely pacific."

Burke, however, was ahead of his time. George III had British public opinion behind him. The argument prevailed that since the people of Britain paid heavy taxes levied by Parliament, Americans ought to be compelled to do the same, irrespeccompelled to do the same, irrespec-tive of whether or no they had a voice in the making of the laws. Even Burke's noble declaration— "Magnanimity in politics is not sel-dom the truest wisdom, and a great Empire and little minds go ill to-gether"—passed by unheeded.

The War With France Burke's part in the political strug-gle which followed the French Rev-olution was a different one. Here he was as ardent for war with France as, in the American case, he France as, in the American case, he had been urgent for peace. He demanded a crusade against the Jacobins to savt the established order of Europe. "His apprehensions of the possible effects of the revolution on his own country." Mr. Newman says, "were no doubt as unreasonably exaggerated as was Pitt's translation of them into practical effect." Nevertheless, they represented the will of the England of the day. Eventually war was declared, not cate-

A SCHOLARLY and well-written life of so great an orator, author and statesman as Edmund Burke is always to be well-comed and Bertram Newman's book justifies this description.

There were three events in British history in which Burke played an especially prominent part. One was that of the American War of In-

ceedingly difficult if not impossible of acceptance.

"It will be a very short war," said Pitt, whose policy Burke supported, "and certainly over in one or two campaigns."

"No sir," replied Burke, "it will be a long war, and a dangerous war, but it must be undertaken."

Burke proved right as to the nature of the conflict on which he helped to induce England to embark, for it lasted intermittantly from 1793 to 1814 and involved a burden of national debt that could never afterward be removed.

The Hastings Trial The Hastings Trial

A third national event in which Burke took a leading part was the trial in the House of Lords of Warren Hastings, the famous Governor-General of India, who was charged with speculation. In this Burke appeared in the odious rôle of chief promoter of accusations which he failed to establish though he pressed them remorselessly through-out a trial which lasted seven years and two months. In the end Warren Hastings was acquitted but was left a ruined man owing to the heaviness of the costs involved.

Mr. Newman finds excuses for

Burke. "Our sympathies," he says, "go out readily, perhaps in the circumstances too readily to the man of action as against the man of words. We feel it almost intolerable that a man such as Hastings should have been subjected to an ordeal so far in excess, as it now appears, of any shortcomings with which he may fairly be charged. But in justice to the less appealing figure of the accuser, we must remember certain facts. That many besides Burke considered there to be a prima facie case against Hastings; nor was Burke speaking for himself, or even for his party, but for the Commons of England. That the trial should have been so prolonged as to have

the course of events in contemporary

This is the author's reason for

gorically, as Burks would have liked, to support freedom of opinion in Europe against the "armed doctrine" of France, but in Mr. Newman's words, "to protect Holland and Belgium from French aggression, and to prevent Antwerp from becoming a base for the French fieet." It may be easy now to condemn Burke's point of view, but Mr. Newman is able to quote high authority for the assertion that in 1792 agitation and excitement were such as to make the counsels of moderation, for which Fox stood in opposition to Burke, exceedingly difficult if not impossible of acceptance.

"It will be a very short war," said "The support of the case committed to his charge was "marred not merely by many honest miscon-eptions, but in its later stages by an utterly unbecoming violence." He claims, however, that Burke acted with the best of motives and that his taking up charges of corruption against a great Indian statesman did good in the end. Burke, he says, was "the first to proclaim, and to impossible to quote high authority for the assertion that in 1792 agitation and excitement were such as to make the counsels of moderation, for which Fox stood in opposition to Burke, exceedingly difficult if not impossible of acceptance."

"It will be a very short war," said "The committed to his charge was "marred not prevent function in the Earth, by 0. E. Rolvage. New York: Harper & Bros. \$2.50.

Carlyle at His Zenith

Carlyle at his Zenith, by David Alec raphy of Frederick the Great, which R. DAVID WILSON'S life of Carlyle will eventually fill Dickens and Thackeray, Tennyson

latest is the fourth. It is therefore a big book and, more than that, it is Lady Ashburton, who had gathered Lady Ashburton, who had gathered to the latest and the latest something very like a great one. round them an intellectual circle to

both as a thinker and as writer, of that great soldier and great gen-which recent events and recent tend-tleman, whom he sincerely admired

six volumes, of which the latest is the fourth. It is therefore a He had entered on his famous friend-

There may be no essential connection between bigness and greatness in literature—there are plenty of small masterpieces—but the fact remains that most of the really great books, whether imaginative or historical, are also long ones. He who takes human nature for his theme needs a good deal of space.

Mr. Wilson's theme is—human nature in one of its most remarkable manifestations. In reading his pages one is impressed anew with the extraordinary quality of Carlyle's character. He had his limitations both as a thinker and as writer,

character. He had his limitations both as a thinker and as writer, which recent events and recent tendencies have combined to emphasize, but for sheer force of character he overtopped his fellows in an age which was rich in eminence.

During the years of which Mr. Wilson treats in his new volume, 1848 to 1853, that character was in full vigor. Carlyle was "at his zenith." All his most important books, except "Frederick," had been written, and his fame was established and cosmopolitan. It was a privilege to meet and even to be snubbed by him.

Historically they were fateful years, years of revolution in Europe and unrest in England, out of which anything might come. Carlyle watched events with a keen eye and, having no big work on hand, plunged into Journalism. He wrote his "Latter-Day Pamphlets," trenchant jeremiads against things as they were and seemed likely to become, pungent attacks alike on privilege and on democracy. He was still looking for his government by "heroes," though giving no clear directions as to where they were to be found. He was as contemptuous of Lord John Russell, Prime Minister throughout this period, as was Disraell, but, unjlike Disraell, though he saw a potential savior of society in Sir Robert Peel.

He journeyed a good deal at this time, to Ireland, in the company of Gavan Duffy, the Young Ireland rebel whe was to become a colonial premier; to Wales and Scotland, to France and later to Germany in search of material for his huge blog-

in Moscow, recovery of Bessarabia must be a cardinal aim of Soviet effort. It behooves us, then, to come to know the diverse elements of the Bessarabian problem, 'f we are to follow with intelligence pectations are fulfilled by even a brief glance through these pages.

"I have driven out from a Bessa-rabian city, largely Jewish and Rou-manian; within an hour listened to a French Protestant pastor addressing his flock, descendants of Swiss settlers; in another hour discussed crop prospects with Germans; then stopped in a village partly Bulgarian, partly Russian; and then attended the laying of the corner stone of a school in a purely Russian village."
Thus, in a graphic sentence, is epitomized the bewildering racial problem. Still more important interna-tionally is the strategic location of the country, controlling the lower course of both the Danube and the Dneister (which form its bounda-ries) all the way to the Black Sea

ries) all the way to the Black Sea and so lying directly in the path of Russia's ambitions for an outlet through the Dardanelles.

Dr. Clark traces the history of this land since the time when the Latin language established itself in the early days of the Roman Empire and he shows how the persistence of that tongue to that present hour has defied the invasions of Vandals, Huns and Goths and the later occuration d Goths and the later occupation of Turks, Poles, Hungarians, Austrians and Russians. Controlled at various times in kaleidoscopic suc-cession by these different powers, various times in kaleidoscopic suc-cession by these different powers, victim of incredible oppressions, these sturdy folk have remained es-sentially Roumanian, and since the war, although they are claimed by the Soviet Government as Russian subjects, they appear at last to be finding their true destiny under a

manian administration.

For all this background and pic-For all this background and picture of present-day conditions—more than half of the volume is devoted to the swiftly changing developments since the war—Dr. Clark ransacked the documents listed in his valuable bibliography, that we should see this battleground of the centuries in its true perspective, unclouded by fogs of propaganda. Few scholars in America at least could handle the logs of propaganda. Few scholars in America at least could handle the sources in their original languages; and few could have produced so simple and human a story. It is a book which students of international affairs, particularly in the Balkans, must know and one which readers of "Greater Roumania" will not want to miss.

ONE evening a company of friends were sitting around the fireside of a professorial home in an English university town talking about books, when one of talking about books, when one of them, a successful business man as well as an authority on many literary matters, emboldened no doubt leaver Bonnets in the tinsmith's Everyone must see them, everyone, well as an authority on many lit-erary matters, emboldened no doubt Beaver Bonnets in the tinsmith's by the spirit of joy and simplicity shop; delighted, too, in all that comthat seemed to envelop the little household and its guests, laughingly Mrs. Ewing is so clever in present rifessed that Juliana Horatia Ewing. the beloved author of Victorian ing. In early days we certainly read childhood, was still in his estima-tion a writer to be returned to over and over again with pleasure. Whereupon for a few minutes, memtoo selectively, leaping such obories were delightedly revived of Jackanapes and his visit to the Fair on the Goose Green, of Mary and her meadow with its cowslips and oxlips and wonderful hose-in-hose and of Jan, the child of the windmill, with his miller's thumb.

We will, those lovely passages from great authors, Herbert, Opalescent. She has a conviction That everyone is named Polly, And thus addresses those few suthor's chapters. We omitted also who stop to love her mildness. "lo, Polly!" lo, Polly!" She says in a soft little works. delight-to wit, those lovely pas-

and wonderful hose-in-hose and of Jan, the child of the windmill, with his miller's thumb.

Thus a stone was cast as it were into the waters of thought; for later in the evening, still happy over reminiscences of Mrs. Ewing's stories, I fell to thinking if it would not be delightful to let that wave of innocent pleasure which had touched our thoughts ripple outward by means of pen and paper and all the other agencies that go to making a newspaper.

Two points of view are possible in studying Mrs. Ewing's art; the retrospective and the purely critical. Both are provocative of thought. To me, that delicious romance of child life, "A Flat Iron for a Farthing," brings back the memory bf quiet lodgings on a wild October afternoon, with the sea rolling; sullenly without; a tempesthous wind raging around our chimney tops and swooping down the deserted streets of the little gray town: streets which, if anybody were bold enough to venture out upon them, would have been found given up to the cataracts of the little gray town: streets which, if anybody were bold enough to venture out upon them, would have been found given up to the cataracts of the little gray town: streets which, if anybody were bold enough to venture out upon them, would have been found given up to the cataracts of the little gray town: the series and the purely criticals. The commendation of the cataracts of the little gray town: streets which, if anybody were bold enough to venture out upon them, would have been found given up to the cataracts of the little gray town: the series of the little gray town: the series of the little gray town: the cataracts of the little gray town: the series of the little gray town: the series of the little gray town: the cataracts of the cataracts of the cataracts of the little gray town: the cataracts of ont upon them, would have been found given up to the cataracts of rain that streamed down them and to the mists that drifted in fleecy companies around and about them, clinging to the mountain side, to which each road climbed at last. In such a setting safe and contented such a setting, safe and contented indoors, I see myself sitting be-side my mother's chair, absorbed in the perusal of this precious story.

Looking like fierce paintings of them

Crude and conspicuous. And everyone does. Blue and yellow, blue and red, plexity of living in nursery camp, Red and green, field, mansion and cottage which They bring to hand Capricorn.

> Here at the garden's edge, In a quiet place, Opal sits tranquilly On her high perch, Her feathers pale, bluish, pinkish

that they are obliged to seek the shade of a distant bowlder or the dim of a quiet market town such as Amesbury; these are the themes presented delightfully in one or shadows of the canvons.

Amesbury; these are the themes by presented delightfully in one or other of these children's romances. The fair at Frimley becomes the fair on the Grey Goose's common.

"The Grey Goose's common."

"The Grey Goose's common."

"The Grey Goose always ran away at the first approach of the caravans, and never came back to the Green till there was nothing left of the Fair but footmarks and oystershells, Running away was . . the only system, she maintained, by which you can live long and easily, and lose nothing. If you run away when you see danger, you can come back when all is safe. Run quickly, return slowly, hold your head high, and gabble as loud as you can, and you'll preserve the respect of the Goose Green to a peaceful old age. Why should you struggle and get hurt, if you can lower your head and swerve, and not lose a feather? Why in the world should anyone spoil the pleasure of life, or risk his skin, if he can help it?

"What's the use?"

Bafore answering which one might have to consider what world—which life—and whether his skin were a fer in the can help it?

Amesbury; these care the themes shadows of the canyons. The sundys a pageantry, a dazzling display of brilliant colors: The umber and drab of the desert is silluminated with gold, amber, deep yellow, crimson, and the fiery glow-ing red. Swiftly the brilliant display passes, and the sun like a great ball of molten gold sends down his lustrous beams upon an austere land. A calmness and a complacence follow. The mountains stand forth in the clearest of blue and every gorge and depression is filled with a vast sublimity. The stunted shrubbery and twisted cactus stand out like brown etchings against a dazzling sky and with a tawny foreground. Subdued colors glow in rich reds along the distant bowled or the distant bowled or the desert is silluminated with gold, amber, deep yellow, crimson, and the fiery glow-ing red. Swiftly the brilliant display passes, and the sun, like a great ball of molten gold sends down his lustrous beams upon an auster land. A calm

Before answering which one might have to consider what world—which life—and whether his skin were a goose skin; but the Grey Goose's head would never have held all the day advances, and the whole land is filled with caim. 'A hawk wheels far aloof in wide concentric circles, pausing at times to balance almost motionless in midair. Only the thin notes of birds are heard, faint The force and finish of Mrs. Ewing's style are phenomenal and all her scenes and characters are dramatic and clear-cut, as Randolph Caldecott discovered when he came and far away, and the whiszing noises of the desert cricket and cleada pierce the vast quiet land. The noisy bird songs of early morn-ing cease; only the cactus wren with his oft-repeated notes breaks the Calecott discovered when he came to study Jackanapes and Daddy Darwin before drawing those famous illustrations of his for them. If the boys in these books are delightful, and Jack March "the work house boy," John Brome the little wanderer of "Lob-Lie-by-thepeaceful solemnity of the long des-

ert day.

There is no distinct marking of follow each other endlessly, broken now and then by singing winds and sudden rains.

etched design of renned clearness and the support of well-chosen and sympathetically applied colors are

In late afternoon when each mesquite tree and arrow-weed casts a long wavering shadow over the drab sand, the desert yields a greater, calmer pleasure, and the immense of the village, little Phoebe Shaw with her white Sunday frock, her regret over her lost posy and her de-sire for a bit of red bergamot to carry with her to Sunday school. "'Red is it,' cried Jack. 'You wait there, love.' And before Phæbe could spaces take on a different mystical beauty. The outlines of the distant mountains glow in fainter tones of blues and grays, and the land be comes illuminated with a subdued pink haze, while every canyon and hollow is filled with iridescent shadand back with his arms full.

"'Is it any o' this lot?' he inows which change often with the

quired, dropping a small haycock of sinking sun. One can almost feel the calm peace "'Don't ye know one from t'other?" of evening settling down; the desert asked Phœbe with round eyes of owl begins to sound his long-drawnout harmonious notes, and the "And spreading her clean kerchief mourning dove and the say mock-on the grass she laid her Bible and ing bird welcome the coolness of prayerbook and class card on it, night with their music. The sands and set vigorously and nattily to drow, picking one flower and another from the fragrant confusion.

The western sky is suffused with changing gold, orange, crimson, and The western sky is suffused with changing gold, orange, crimson, and amber which fade gradually into the deep purple of evening.

A soft breeze, cool and healing "I suppose you know a rose? That's a double velvet. They dry sweeter than lavender for linen.... There's red bergamot, smell it."

steals down from the distant mountains, rustling the dry stalks of the yucca and swaying the sere clumps of grass, and the desert in a vast dimness seems to relax under the tender radiance of the starlit night.

Sea Cinquains

Under Canvas: From a Colored Etching by Hans Figura.

YOUNG Viennese artist about A whom more and more persons are speaking is Hans Figura. His realm is the colored etching. He has developed this form of art expression in a strikingly individual way. His color has the mobility of oil, and there is never a suggestion of any stiff etching. He is a delicate, unobtrusive, skillful worker, bring-

ing to the field of colored etching a sense of unusual freedom in the use of his tools and in the application of Figura's means of supplying Vienna

The Days of the Rush Light

coming more popular.

Miss Jekyll, in her "Old West Surrey," says that we can hardlyin the way of procuring and maintaining artificial light for the long dark mornings and evenings of half the year, that prevailed among cottage folk not a hundred years ago, tvertimot at kjødets lyst har i så høi Till well into the third or fourth grad delt menneskehetens tilbedelse many labouring families could af-ford nothing better than the rushlights that they made at home, and excepting the firelight, had opfylt at alle ting tjener til gode. these, excepting the firelight, had been their one means of lighting all til dette nederlag, og som følte

second injunction: "Thou shalt love Nature's God." thy neighbour as thyself." In these we have the two great commandents, upon which Jesus said "hang tural promises, and enables one te all the law and the prophets."

specifications of human duty and the that the substance of all things is in promises attached thereto, it would the divine Mind, which formed them, eem that there should be no failure one learns how to translate things to reap the fruition of such reason-able demands. Human experience, the tares from the wheat in the field on the contrary, indicates that the light lusts of the flesh have so divided the allegiance of mankind between good form, the beauties of nature, the and evil that mortals have not fully order of the stars, the fidelity of true obeyed the first commandment, nor have they in consequence entered into the realization of the promise that "all things work together for

Discerning the cause of this failure, and recognizing the spiritual hunger of the human race for a more satisfying and demonstrable religion than that which teaches the reality of both good and evil, Mary Baker Eddy tells us in the Preface to "Science and Health with Key to the Scriptures" (p. vii) that "the only guarantee of obedience is a right apprehension of Him whom to know aright is Life eternal." She also says (p. viil), "The question, What is Truth, is answered by demonstration. -by healing both disease and sin; Christian healing confers the most health and makes the best men."

Noble and restrained, yet rich in radiant charm.

Stately you stand, O brother, on your giant hill.

Calmly I rest, my brother, on my plain;

Waiting, knee-deep in rich and rustling foliage,
While through the Channel rolls our mighty tide.

Those golden stars that twine a halo round me here.
And sparkle as well above your gracious brow.

The talk avoided politics but fell much on literary topics. In short, he was in a charming and agreeable mood. He was to spend one day at Puteoli and another at Baiae. There you have an account of his visit, or

THE Apostle Paul, in his epistle to the Romans, gives us the definite assurance that "all things work together for good to them that love God." His affirmation is characteristic of practically every promise. teristic of practically every promise writings of Mrs. Eddy that God is found in the Scriptures, in that its both understandable and lovable, fulfillment is made contingent upon They enable one to discern the difthe performance of some right act. ference between the counterfeit and If, therefore, one wishes to enter into that wonderful experience of realizing that all things work together for good, he must begin by learning to shay the first and the genuine in the things of daily life, and show one how to render to God the confidence and affection which have heretofore been primary life, therefore the counterfeit and the genuine in the things of daily life, and show one how to render to God the confidence and affection which have heretofore been primary life, therefore, and the counterfeit and the genuine in the things of daily life, and show one how to render to God the confidence and affection which have heretofore been primary life. learning to obey the first and great-est commandment in the Hebrew law, In fact, Christian Science makes which Moses gave to his followers, and which Jesus afterwards approved: "Hear, O Israel: The Lord our God is one Lord: and thou shalt love the Lord thy God with all thine heart, and with all thy soul, and with all thy might." The fact that Jesus and Moses concurred in plac-ing this commandment at the head of the list of religibus statutes makes its observance paramount. Furtherneighbor as we should until we learn more, coupled with this command is how to look "through Nature up to

The practice of Christian Science fulfills the conditions of the Scripmeet the requirements which these With these brief, but all-inclusive prescribe. When it is understood friendship,-all are seen to bear testimony to the goodness of God. The hand, is shown to be fallacious, because it is merely a false sense conceived by a so-called mortal mind, which is doomed to destruction.

Divine Love, as it thus enters into human consciousness through understanding, is productive of purity: and through this mental state it is seen that all things at all times are subject to God's law. A foretaste of this spiritual consciousness, even in our present experience, is made manifest, as stated above, in the growing dominion of mankind over sin and disease and the innumerable fears which beset mortals; in fact, it promotes improvement in every condiand this demonstration shows that tion of mind, body, and estate. Furthermore, it tends to establish on earth an understanding of the divine Principle upon which universal love and its harmonious government of man depend, and it explains to the satisfaction of anyone who has ears to hear, that "all things work to-

#### INVESTMENT DEMAND FOR STOCKS GOOD

High-Priced Shares Continue Active-Specialties Prominent

NEW YORK, July 6 (P)—Stock prices displayed a strong undertone at the opening of today's market, with a good investment demand for the seasoned dividend-paying issues.

Early gains of 1 to 2 points were recorded by American Water Works, Eastman Kodak and Chesapeake &

mand.

Railroad traffic for the first six months broke all records but the total of car loadings for the week ended June 25 was again below that of the corresponding period last year. Chicago & Eastern Illinois proferred quickly moved up 2 points to a new high, and Atchison, Guif, Mobile & Northern, Atlantic Coast Line and Wahash suickly advanced a point of Wabash quickly advanced a point or more above yesterday's final quota-

ons.

Electrical manufacturing shares
wept forward under the leadership
General Electric and Westinghouse
Ianufacturing, both at new highs.
olorado Fuel, American Radiator and
inion Carbide also reached new high

Frothers A and Pittsburgh Coal each selling down a point.

Foreign exchanges opened irregularly lower, Italian lire breaking 8½ points to around 5.42% cents, and Spanish pessetas dropping 5½ to just above 17 cents. Demand sterling and French frames held fairly steady around \$4:85-15 and 3.91% cents, reguestively.

Movement Gains Headway

Higher dividends by several industrial corporations added momentum to the forward sweep of prices during the morning which raised a number of shares from 2 to 3 points above the previous close. Among them were shares representing such varied industries as Atlantic Refining, Continental Baking A, Continental Can, Timken Roller Bearing, Famous Players, Worthington Pump, and Manhattan Electrical Supply.

Electrical Supply.

The renewal rate for call loans was unchanged at 4½ per cent.

Bond Market Firm Easing tendencies in the money market, combined with confidence arising out of the record-breaking volume of payments to investors this month, gave the domestic bond market a firm undertone today, although foreign issues displayed considerable irregularity. Slight improvement in the demand for high-grade mortgages continued to be reflected in gradually advancing prices.

vancing prices.

Italian issues inclined to heaviness, although offerings were not large, but German Government obligations were firm. French and Belgian bonds were elatively inactive. The new Budapest s broke 4 points to 87, later rallying

68 broke 4 points to 87, later railying to 88.

Further moderate buying of Chesapeake Corporation 58 brought a fractional gain, while fairly heavy offerings of Union Pacific 4½s and Southern Pacific Oregon Line 4½s were readily absorbed around the issue prices. Popularity of convertible bonds was again reflected by a point gain in Delaware & Hudson 5s.

Goodyear Tire 5s, which suffered a severe sinking spell on the dissolution of the offering syndicate, rallied 3 points to 96½, against a low of 91%. Chicago Railway 5s featured the utility group with a gain of nearly 2 points.

Treasury 4½s were outstanding in the firm Federal Government list.

#### DIVIDENDS

Hercules Powder Company declared the regular quarterly dividend of 1% per cent on the preferred, payable Aug. 15 to stock of record Aug. 5.

Cerro De Pasco declared the regular quarterly dividend of \$1, payable Aug. 1 to stock of record July 14.

Eastern Massachusetts Street Rall-way Company declared the usual seminanual dividend of \$3 a share on the first preferred and sinking fund stock, payable Aug. 15 to stock of record July 30, also semiannual dividend of \$3 a share on preferred "B" stock, payable Aug. 15 to stock of record July 16.

White Sewing Machine Company depayable Aug. 1s to stock of record July 30, also semiannual dividend of, 33 a share on perferred "B" stock, payable Aug. 1 to stock of record July 5.

White Sewing Machine Company declared the regular quarter stock, payable 1stock of record July 1s.

Esacon Oil Company declared the regular quarterly dividend of \$1.87\% a share on the preferred stock, payable Aug. 15 to stock of record Aug. 1.

New York Merchandise declared the regular quarterly dividends of 50 cents on the common and \$1.75 on the preferred, both payable Aug. 1 to stock of record July 20.

Brown Shoe declared the regular quarterly dividend of 1\% per cent on preferred, payable Aug. 1 to stock of record July 20.

Archer Daniels Midland Co. declared the regular quarterly dividend of 1\% per cent on preferred. Payable Aug. 1 to stock of record July 21.

Borden Company declared the regular quarterly of 1\% per cent on the preferred both payable Aug. 1 to stock of record July 21.

Borden Company declared the regular quarterly \$1.25 common dividend, payable Sept. 1 to stock of record Aug. 15.

American Light & Traction Company declared a quarterly dividend of \$2 a share on the lncreased amount of common stock, payable Aug. 1 to stock of record July 15. This is equivalent to \$3 a share on the basis of old capitalization which received \$2 per quarter.

Lawrence Gas & Electriff Company declared the regular quarterly dividend of \$3 cents, payable Aug. 1 to stock of record July 15.

Columbian Carbon Company declared the regular quarterly dividend, payable Aug. 1 to stock of record July 14.

Railway & Light Securities Company declared the regular quarterly dividend of \$1.50 on the preferred and \$9c on the common, both payable Aug. 1 to stock of record July 15.

CLEVELAND DISTRICT LOANS CLEVELAND DISTRICT LUANS
CLEVELAND, July 6 — The Federal
Reserve Bank of Cleveland reports loans
at member banks in this district, secured by stocks and bonds, as of June
15, at \$622,000,000, compared with \$472,000,000 in 1925 and \$539,000,000 in 1925,
All other loans declined the last month,
while investments rose from \$657,000,000
to \$678,000,000.

WESTERN MARYLAND FINANCING

MASSACRUSETTS LIGHTING Massachusetts Lighting Companies has called for redemption at 103 and interest, on Oct. 1, 1927, all the outstanding 7 per cent 10-year gold debenture bonds, dated Oct. 1, 1920, amounting to \$1,000,000.

NEW YORK, July 6—J. Henry Schroder Banking Corporation has received advices from its London offices that the £5,000,000 City of Berlin 6 per cent 30-year loan, offered there at 98½, was 2½ times oversubscribed.

ALLIED CHEMICAL CHMOND, July 6—Allied Chemical ye Corporation has authorized Governey Byrd O'Virginia to announce that itends to develop a nitrate plant at everl, in this State. It will be the set of its kind in the world.

BOSTON STOCKS MAY RAILROAD EARNINGS ARE

> Of 30 Important Roads 13 Have Gains in Net-Compare Well With 1926

RATHER MIXED

expectations.
In the four full weeks of May,

In the four full weeks of May, weekly car-loadings averaged about 1,024,185 cars, the best average for any month thus far this year. This average may be appreciated when it is considered that the high figure for any week to date in 1927 was only 1,029,126 cars.

In the closing days of the month, however, a substantial decline in loadings was noted, as indicated by the aggregate for the week ended June 4, over the Memorial holiday, of only 911,298 cars.

Adverse Influences

Probably the worst sufferers from the effects of the Mississippi flood was Missouri Pacific, whose May gross dropped almost 7 per cent below the May, 1926, total, and whose rising

dropped almost ? per cent below the May, 1926, total, and whose rising operating ratio, undoubtedly attributable to flood conditions, caused a 68 per cent decline in net for the month. While the coal strike lessened traffic, and, of course, earnings on some roads, it benefited others, particularly Chesapeake & Ohio and Norfolk & Western.

Only seven of the 30 roads compared in the table appended showed increases in both gross and net during the month. Chief among these were Baltimore & Ohio, Rock Island, Erie and a few of the smaller carriers in the Southwest. Most of the big trunk lines reported gains in either gross or net, while results of the New England systems, New Haven and Boston & Maine, were approximately equal to those of May last year.

ACTIVE DEMAND IN HIDE MARKET

Prices Rule Strong, and Supply Limited—Calfskins Well Bought

Demand in the packer hide market is active, and prices are strong. Light, and ex-light native steers, and cows moved up a full cent in last week's trading.

Shoe manufacturers are demanding more upper leather than they are able readily to obtain despite the fact that prices have advanced from 2½ to 7½ cents a foot.

While sole leather has not advanced as have upper leathers suitable for men's shoes, nevertheless cut soles have moved up from 2½ to 5 cents a pair and are in good demand.

Strength in the hide market is featured by the fact that packers declined to book further orders at the close of last week at the then ruling rates, with the exception of heavy Texas steers and native bulls. Leading tanners say that if the demand for packer hides keeps up at its present rate stocks of domestic hides will not suffice to meet requirements, and buyers will be forced into the South American market, notwithstanding that the quality there at this season is low.

Country hide dealers are not offering stocks freely as the situation is strong and prices are firm.

There was an active inquiry for packer calf last week. About 30,000 May calfskins were sold at 24c and 25,000 June at 25c. The Chicago city calfskin market was practically cleaned out at 21c. June packer kips were offered at 24c, and one brand of the packer market is strong, and fairly active.

The principal sales of packer hides last week follow:

Year Sales

FIGURE CITILITY FINANCING
Electric light and power public utility financing during the half year
amounted to \$792,700,000 compared with
\$725,800,000 for the first half of 1926,
the Electrical World reports. It has cost
the industry considerably less to carry
on its financing during the current year
when yields have averaged from 5.19
per cent to a high mark of 5.69 per cent.

RECORD TRUSCON STEEL SALES
YOUNGSTOWN, July 6—June proved
the record sales month with Truscon
Steel, and the first half gross business
exceeded the figures for the similar
period last year. Despite unfavorable
weather conditions in the first three
months which retarded business, earnings are keeping pace with volume of
business. In 1926 Truscon's net available for common was \$3.81 a share. able for common was \$3.81 a share.

NATIONAL FIREPROOFING CO.
PITTSBURGH July 6—A special meeting of stockholders of National Fireproofing Company has been called for Sept. 1 to vote on \$3,000,000 increase in indebtedness. On Jan. 1 1927, the funded debt consisted of \$638,000 first mortgage 5 per cent bonds due \$125,000 annually to 1932.

LONDON WOOL SALES

LONDON, July 8 (P)—At the wool sales today 11,374 bales were offered of which 10,000 were sold. There was a good selection and keen competition from all quarters; the opening advance was well maintained.

PUBLIC UTILITY FINANCING

DEVOE & REYNOLDS

Devoe & Reynolds reports for the six months ended May 31, 1927, profit of compared with 63,339 the previous week and 63,831 for corresponding week last before federal taxes, compared with \$52, year. Receipts from connections were 556 in the similar period of the previous 33,424 cars, compared with 57,396 for the fiscal year.

#### WORLD WOOL PRICES SHOW RISING TREND

London Auction Level Up 5 Per Cent-Medium Crossbreds in Demand

There was a strong opening of the fourth series of Colonial wool suctions in London yesterday. As usual, on an opening day the selection was nothing over which to grow enthusiastic, containing very few of the really super wools, but in spite of that fact, prices were very close to a per cent dearer on the average.

Crossbred wools were in fairly keen demand, more especially medium qualities, which were frequetly a good 10 per cent above the closing rates of the preceding series.

Fine crossbreds also, were in strong request, and were up about 5 per cent, while low crossbreds were par to 5 per cent, while low crossbreds were Punta wools. Merinos were less dear by comparison than were the crossbred wools were very strong as were up 5 per cent, but ordinary types were up 5 per cent, but ordinary types were up 5 per cent, but ordinary types were up the latter frequently being withdrawn in consequence of high limits. All scoured wools, except combing crossbred descriptions, which were par to 5 per cent higher, were steady at last sales rates.

England and the Continent have

ingland and the Continent have a competing for medium crossbred is of the South America type in market within the last week of Thus, German buyers and Enghave been seeking wools of the atevideo and Concordis Is type, ch have been sold as high as 40 is in bond for shipment abroad.

Argentine Market Firm here has been been some call also

There has been been some call also re wools of IIIs Montevideo quality rexport, but domestic mills have en ready to take these wools at 32

for export, but domestic mills have been ready to take these wools at 32 cents in bond.

Interest in Argentine Vs has been in evidence again on the part of the home trade, and some wools are reported to have been sold at slightly rising 26 cents, the top sale reported being at 26% cents. For IIs, the market is firm at 26 cents for any super skirted and rewound wools. Some interest is still displayed in 58-56s Montevideos at about 47 cents.

The National Wool Council of the Commonwealth estimates the wool shortage for the coming season in Australia, in consequence of the drought, at 250-00 bales, which means that the clip for the coming season will amount to some 2,000,000 bales; that is, it will be substantially back to the level of the 1925-26 clip.

There was a small sale at Adelaids, last Friday, which included about 1200 bales of autumn-shorn, wool. There was good competition for these wools, and prices for the best combing 54s were quotable on the equivalent basis of about 96 cents, clean in bond at Boston.

Brisbane Prices Harsen

t Boston. Brisbane Prices Harden Brisbane Prices Harden
The three day's sale in Brisbane, closing Thursday, showed hardening prices to the and of the series. The Continent, notably, Germany, France and Russia, were operating freely, and on the closing day Russia was buying without limits. Prices were approximately 5 per cent dearer than at the close of the preceding series on not a few of the wools, and generally 2½ to 5 per cent up.

July 1 were \$40,649 bales, compared with 333,656 bales in the similar period of last year.

Stocks of foreign wool in bond continue to dwindle. Stocks of wool, other than "carpet," in bond at the various bonding points of the country, totaled 74,793,656 pounds, compared with 78,962,973 pounds at the first of the preceding month and 123,941,289 pounds at the like date of 1926.

Meanwhile, wool consumption in this country precedes at a steady pace. During the month of May, there were consumed, according to the latest Government report just issued, 37,-540,890 pounds of wool, including 10,-526,724 pounds of carpet wool. as reported, compared with 37,447,364 pounds of carpet wool. as reported, compared with 37,447,364 pounds in April, of which 10,591,642 pounds were carpet wool.

Erie Ent 8 78 to 36 to

505.724 pounds of wool, including 10525.724 pounds of warpet wool, as reported, compared with 37,447,364
pounds in April, of which 10,51,642
pounds were carpet wool.
For the first five months of this
year, the quantity consumed totaled
248 pounds of carpet, compared with
258 pounds of carpet, compared with
269 carpet wool.

Combing Wool Steady
Wool values in this market are rising steadily against the buyer. Sales
of Ohlo delaine have been made at 45
cents, in more than one instance, and
of half-blood Ohlo at 44 cents, with a
cent more now generally asked for
each grade. For quarter-blood and
of half-blood Ohlo at 44 cents, with a
cent more now generally asked for
each grade. For quarter-blood and
of half-blood Ohlo at 44 cents, with a
cent more now generally asked for
each grade. For quarter-blood and

SMALLER TAXES LOWER REVENUE FOR HUNGARIANS

> Despite Small Yield, Country Said to Be Forging Well Ahead

is increasing. The item of "stamps and dues" suggests greater business activity. Hungary is steadily improvactivity. Hungary is steadily improving and therefore it strikes one all the more forcibly that there is practically not the slightest increase in revenues from 'direct taxes' or from the "turnover tax" over nine months. The officials say, however, that taxation during and after the war has been enormous in order to swing the country's expenses in trying to make

been enormous in order to swing the country's expenses in trying to make good the losses caused by the war, and to carry out the financial reconstruction prescribed by the League of Nations. The officials add that it has always been the Government's intention to decrease as fast as possible those taxes which bear most heavily on the largest number of persons, such as the direct and turnsover taxes. These taxes were much reduced for the current financial year and thus, the officials remark, the receipts against these items have the receipts against these items have been kept down to hast year's level while, however, the country has really been forging ahead economically.

#### MIAMI DEEPENING HARBOR CHANNEL

cost of about \$2,400,000 and will spend several hundred thousand dollars in extending jettles.

The city of Miami will dredge a turning basin at a cost of several hundred thousand dollars, and will be required thousand dollars, and will be required to spend \$200,000 to \$400,000 in altering some city piers and dredging to 25 feet deep alongside.

When completed Nov. 1 the entrance channel will have 25 feet at mean low water instead of 18 feet, and 200 feet width at narrowest point instead of 100 feet. Engineers declare dredging will overrun one or two feet, and than allowing for a rise of tide of 1.8 feet to 2.5 feet Miami's channel entrance at high tide will have close to 30 feet dapth.

Total expenditures by city and Government in improving Miami harbor will exceed \$3,500,000.

#### MOVE TO UNIFY WEIGHTS IN INDIA

Present Diversity of Standards Held Confusing

CALCUTTA (Special Correspond euce)—The movement in favor of unifying all commercial weights and measures in India on the basis of decimal metric standards is gaining ground. It has naturally the back-ing of commercial organisations in other countries, notably the All-America Standards Council of Cali-

BUDAPEST (Special Correspondence)—Greatly decreased taxation for the present financial year is declared in official circles to be responsible for the fact that revenues collected for the first nine months of this period do not exceed in the principal departments of taxation those of the corresponding nine months of the previous year.

In the tenth monthly report of the figures of revenues assembled from July 1, 1926; to March 31, 1927, amounting to roughly \$114,000,000, a gain of \$10,000,000, and for the corresponding period of the previous financial year to about a stypical opinion in India and for the corresponding period of the previous financial year to about \$104,000,000, a gain of \$10,000,000.

One may say this is not bad, but upon examination of the details it is observed that this increase can be laid almost entirely to "departmental receipts" are understood chiefly moneys coming in from foreign sources such as visée, it has have invested \$12,500,000,000,000 in for-eign securities, it was disclosed in the propose of the previous financial year to about the previous financial year to about the previous financial year to about a stypical in London vetoed the proposal.

The Government of India's view is believed to be that action in India of Marcican India of Marci

# COTTON HOLDS

Price Climbs but Still Is stock Said to Be Below Cost

tions point strongly to a general reduction in cotton production for the current season of 3,000,000 to 5,000,000 bales under the recordbreaking crop of approximately 18,000,000 bales last year.

18,000,000 bales last year.

Statisticians announce that they expect theaGovernment acreage report on July 9 to show that about 42,000,000 to 44,000,000 acres were harvested last year. An acreage of 44,000,000 in cotton now means between 40,000,000 and 42,000,000 actually harvested, as 1,000,000 or 2,000,000 acres are usually abandoned for various reasons every year.

the low price of about 12½ cents a pound, or \$65 a bale, that was reached during the late fall of 1926, the price of cotton has risen about 5 cents a pound, or \$25 per bale, above the low price. But bankers and farmers almost unanimously pro-claim that the price of 17½ cents a pound is still below the average cost of production and credit in financing the new crop is much more limite

#### NORTHWEST RAILROAD UNIFICATION TO BE

TRADING LICHT

NEW YORK, July 6 (P)—signing at the specification for permission to merge the Northern Pacific and Great Northern railways was reported in railway circles here yesterday as one of the final steps in the diamond issues higher on reports that the "precious stone" bill should receive heter reception in the October meeting of the South African Legis and textiles were easier. Rubber shares were steady. Argentine rails were weak. Home rails were guiet. Royal Dutch was 23% ex-duty parts will be filed with the Interstate shares were steady. Argentine rails were weak. #### WORKERS OF WORLD **URGED TO UNIONIZE**

Labor Called On to Rid Itself of Political Follies

Special from Monitor Bureau NEW YORK-Declaring that world problems are being more effectively dealt with by economic and industrial factors than by political institutions, Matthew Woll, vice-president of the American Federation of Labor, has just called upon the workers of all just called upon the workers of all nations to form a world trade union, based upon American trade union plans and procedures.

Mr. Woll is president of the International Photo Engravers' Union.

and his appeal for a union of world workers appears as an editorial in the "American Photo Engraver," of-

ficial organ of the union.
"The time is here," he writes,
"when international labor forces should no longer be divided because of considerations relating solely to political theories and political gov-ernments. Now is the time for the workers everywhere to rally themselves internationally on the eco-nomic or industrial field, rid their NIFICATION TO BE labor movements of the political follies of the past and unite in improving the working conditions of wage earners the world over."

#### JAPAN IS FACED WITH PROBLEMS OF FOOD SUPPLY

Large Increase in Population Demands Extension of Farm Operations

TOKYO (Special Correspondence)

—During 1926 Japan's population
gained approximately 1,000,000,
bringing the total for the Nation stock flotations in the same period totaled \$108.411,000. A single security issue of \$23,200,000 went to the Far East during the quarter while three English territorial possessions borrowed \$3,025,000.

Germany, which was a heavy borrower during 1925, disappeared entirely from the lists of new flotations in the United States.

#### Employment Needs

A spokesman for the Foreign Office issued the following statement in this connection: "Japan is now experiencing a population increase such as that of Europe in the sixties and seventies of the last cen-tury. The grave aspect of the sit-uation is not the increase itself but the difficulty of finding employment for the increasing population. If ec-onomic depression continues to hold the country in its grip it is certain to influence the birthrate by decreasing marriages and limiting the

size of the families.

"A patchwork policy cannot meet this situation. The solution must be fundamental. A more intensive in-dustrialization is the only solution. During the war and post-war booms there was no talk of unemployment Factories, as a matter of fact, had a great deal of trouble finding workers. The slump which followed the war is still with us. We must learn to industrialize on a peace-time

The report of the Ministry of Agriculture and Forestry said: "Increasing population must be met by in-creasing the supply of food. The Government is making every effort to extend the area of land under cultivation. These plans involve not only land in Japan proper but in the dominions The colonization of the Hokkaido, the extension of rice planting in Korea and more diversification in other foodstuffs, includ-

Outlay Since Automobile Is 20 Times What It Used to Be Special from Monitor Bureau

NEW YORK; July 6—The constantly growing popularity of automobile travel in the United States has increased expenditures for road building and maintenance from a negligible figure to one of the largest items on the Nation's tax bill, according to a survey just made public by the National Industrial Conference Board here.

"Our present annual road bill amounts to more than one-sixth of the conference annual road is a survey of the conference and is a survey."

the entire public budget, and is ex-ceeded only by our governmental expenditures for education and pro-

tection," the report says.

Twenty-five years ago, when the "horseless carriage" was beginning to make its way into popular favor, road building cost the Nation only \$75,965,995, while the road building and maintenance program of the BERLIN, July 6 — Reichsbank condensed statement, in reichsmarks, follows (600 omitted):

This Last Last United States during 1925 reached a total of more than \$1,500,000,000, or more than \$1

## Summer Radiocast Outlook Most Promising in History

Radiocasters and Set Engineers Have Co-operated to Give the Listener the Very **Best in Programs** 

The following article by Dr. Alfred N. Goldsmith shows the great progress that our newest industry has been able to give the public. The old-fashloned practice of putting the radio set away with the fur coats need no longer be followed. Year around, radio is rapidly becoming a reality.

Once more, summer time, rolls around in the eventful career of radiocasting. Yet its advent this year goes by hardly noticed, in contrast with the earlier years of the young art when the first signs of warm weather sounded the curfew for radio entertainment. Radiocasting then had not yet become as indispensable a part of modern life as it is today; well might it have been overlooked with the seasonal call to the out-of-doors, and even though not forgotten by the more ardent radio fan, conditions of reception with the appearance of warm weather discouraged many.

I ference. This phenomenon of nature is no more avoidable than rain or show or wind; and at the present state of the radio art, there is no such device as a static eliminator. Hence the only weapon against static is "brute force," or outdoing static with increased signal strength at the receiving end. In other words, power must be increased sufficiently to break its way through atmospherical interference and triumphantly override its disturbing noises.

This competition of nature's forces has been met by radiocasters through the steady increase of their

the appearance of warm weather discouraged many.

The whole picture has changed in this, the sixth, summer of radiocasting. The high standard of entertainment is not lowered with the advent of spring and the early approach of summer. Programs continue in full force, providing a high type of entertainment and enlightenment. Outdoor life, while beckening with its many new pasbeckoning with its many new pas-times after the long winter, need not interfere with radio's enjoyment. Indeed, there is every indication that radio will occupy its just place in summer-time activity through its addition in camping and vacationing paraphernalia in the form of the small and compact superheterodyne

Clearing the Summer-Time Air

No better impetus to radio this tummer could be wished for than the activities of the Federal Radio mission, whose good work is already beginning to be felt. In a methodical and judicious manner this new governmental body has made commendable progress in untangling the wavelength snarl of radiocasting. Already the interference which was experienced in some areas, due to unregulated and misguided radio-casting activities, has been eliminated in large measure by greater separation between frequencies in congested radio districts, so as to incongested radio districts, so as to insure clean-cut separation of programs and eliminate troublesome overlap, whistles and cross talk. Instead of the entire radiocasting establishment of the Nation operating at one time, with a resultant confusion comparable with the Tower of Babel of Biblical renown, the Federal Radio Commission has very wisely sought to reduce the number of radiocasters operating at one time to proportions in keeping with the limited though adequate traffic facilities of our radiocasting waveities of our radiocasting wave-lengths. Throughout their work the rights of the radio listener as the prime consideration have been re-spected, while radiocasters have been assured better conditions for the transmission and reception of

10 Correct time. neir efforts.
The beneficial efforts of the new The beneficial efforts of the new regulations will become more and more evident during the next few months. Radio fans in the congested centers are experiencing the thrills centers are experiencing the thrills will recently reception once more, made possible by careful adherence to rationally assigned wavelengths or frequencies. Long-distance or "DX" reception which, during the usual hours of listening-in had become almost a lost art, is now being reinstated with the elimination of the thick fog of interference here-tofore enshrouding the air. Good tone quality, which is the ultimate aim of possible to a fuller extent.

Better Summer Programs no fear that the work of the "radio traffic officers" will reduce the voltainment. Far from being the case this work actually aims at the en couragement of good programs by allotting exclusive wavelengths and more time to organizations in a posi is a public forum of vast proportions and only those with something worthy of the attention of the vast gathering it commands should be permitted to take the invisible stage in serving the public to their utmost capacity. In radiocasting, we have the key to some 6,000,000 homes.

Surely this great opportunity must Due in large measure to the steady expansion of the outside pick-up sys-tem of radiocasting stations, whereby program material may be gathered outside the studio, summer-time radio programs are certain to be on a par with those of the indoor If anything, summer-time programs promise to have more sur-prises and thrills in store for the listener; for the outdoor season provides the program director with opportunities to gather exceptional pro gram material in the form of outdoo gram material in the form of outdoor concerts, sporting events, great public meetings and national celebrations. It is in the summer time that "radio reporters," with portable microphone and wire, and in some instances with shortwave radio relay transmitters, are sent out into the field in search of stirring events for the radio public.

casting as any other single factor, first, by making the same fine programs available to large portions of the country and to a collective audience running into the tens of milng into the tens of lions; and secondly (because of the magnitude of this audience), by war-ranting the expenses of any program feature no matter how elaborate. Collins, tenor; Beatrice Reynolds, accompanist. individual station could for a mo-ment consider the tremendous costs of the professional entertainment features which are now usual in net-work radiocasting, for this young art, as in the case of the newspaper, features which are now usual in network radiocasting, for this young art, as in the case of the newspaper, depends on the size of its audience for the magnitude of its efforts.

Defeating Static

Yet the finest of programs would be of little avail if broken up and gardled as the result of static inter
10:50 The Friendly Maids.

has been met by radiocaster through the steady increase of thei transmitting power. In fact, it is generally agreed today that radio-casting began with an altogether too limited conception of the amount of power required for reliable service, just as modern illumination began with the candle as the basis of house the time of the candle as the basis of house the time of the candle as the basis of house the time of the candle as the basis of house the time of the candle as the basis of house the time of the candle as the basis of house the time of the time of the candle as the basis of house the time of time of the time of time of the time of t lighting, which feeble illuminant would today be hopelessly inadequate for our more brilliantly lighted homes and streets.

From 500 watts as the standard for good broadcasting service, we have gone to 5000 watts in the case of many leading stations, and even to higher power in the case of a few stations, notably WJZ of New York, with 45,000 watts, WGY of Schenec tady with a rating of 56,000 watts, and KDKA of Pittsburgh with 50,000

Today, in the parts of the United States where most people are found, there is ample signal strength from one or more stations to compete successfully with the average static interference of summer time. Radio

ment to an all-year-round service.

Especially is this felt in rural districts, far removed from the centers of population, which could be reached on a daily basis only during a few months of the year, with the

A Real Radio Engineer

The opening radiocast of the St

low power formerly employed. To-day these rural districts are fre-quently assured of ample signal strength to ride through summer-time

Static.

Yet the radiocast transmitting end alone cannot defeat summer-time interference single-handed. It must have co-operation at the receiving end as well. The radio enthusiast can, within reason, contribute his share by selecting programs from local and powerful stations that prolocal and powerful stations that pro-yide ample signal strength to over-ride the interference level and by be-ing content with fair volume from the loudspeaker, so as to enjoy the radio entertainment without bringinterference of summer time. Radio engineers have measured the average strength of static throughout the year, and present-day radiocasting stations are providing local service fully capable of coping with it.

Higher power, more than any other factor, has converted radiocasting from a seasonal entertainment without bringing up the objectionable undercurrent of disturbance to a degree where it impresses itself on the listener's consciousness. Placing the loudspeaker at a reasonable distance from the listener helps somewhat.

Considering all the contributing

Considering all the contributing factors, it is sure that this summer

The cast of the

dolin arrangement of Schubert's "Unfinished Symphony in B minor."
"The Unfinished Symphony" is but a fragment, the first two movements only being complete. There are but nine bars of a scherzo, a playful theme, and with these expressed the

symphony stops. Probably, however, among all of the composer's works not one is more beautiful in ideas or more perfect in form than this.

It is not known why Schubert abandoned it and no more of it has ever been located. The first page of the score is dated "Vienna, October 30, 1822." Its first performance was

30, 1822." Its first performance was given at the Crystal Palace in London on April 6 of the same year. The principal Schubert themes were set to words with music arrangement by Heinrich Berte in the recent New York success "Blossom Time." The song "You Are My Star of Love" was the selection in which the principal theme of the "Unfinished Symphony"

YET TO BE CONQUERED

YET TO BE CONQUERED

New York Times: When the Wright Brothers exhibited their invention on the Hudson about 20 years ago a wind of any strength kept it on the ground. But it was not long before the improved plane could be flown in a gale. Our mail carriers cover their routes in all kinds of weather.

It is not distance but storms that make the Atlantic passage formidable. It will cease to be so when ships heavier or lighter than air, are built specially for such a service, and a competent ocean weather bureau is established. Navigating skill in the air will consist largely in avoiding storms. Great Britain is completing a dirigible that will be used for voyages between England and Canada in 1228. A sister ship is to furnish a service to Imdia and Australia. The presumption is that the seas will be crossed in a comparatively few years by multimotored airplanes carrying express matter and passengers.

Why Voters Don't Vote

Wish we could find illumination in the result of the very comprehensive endeavor of the National Civic Federation to find out why about two-thirds of the qualified voters of the United States failed to vote in the important elections last year. The federation sent out a huge number of questionnaires seeking alike this information and suggestions as to how so menacing a situation might be corrected. According to a report now given out, 60,000 answers have been received—a substantial number and one from which a reasonable idea of the motives and limitations affecting the mass of the voters might be

But the summary of these replies lacks true significance. Nothing is offered in explanation which was not already known to the average man. Nothing is presented in the way of a remedy except the obvious one of education and agitation. True, many urge that methods of nomination be simplified, but to some simplification means a return to the old convention system, while to others, in equal number, the extension of the direct primary system seems desirable. Many complain of the length of the ballot. Others think that local elections should be freed from all association with national politics. Compulsory voting, absentee registra-tion, fines and penalties of every sort to be imposed upon non-voters, all are proffered as possible methods of persuading or compelling

people to vote.

With no desire to minimize the importance of such an inquiry as that made by the Civic Federation, it seems to us that its results are of little value. Indeed the situation confronting American students of politics may imply some thing more than a mere careless neglect of the obligations of citizenship. It may be the American form of that reaction against democracy which history shows has always followed a war. and which the records of the present decade show to have been resultant from the recent World War to an unparalleled degree. In every country the drift of politics has been toward absolutism or ultra-conservatism. Mussolini, de Rivera, Pilsudski, stand for absolutism; von Hindenburg, Poincaré, Baldwin and Coolidge for ultra-conservatism. In the United States the content of the great mass of voters with the government as at present administered is so obvious that the politicians of the opposition party are hard put to it to find issues which may awaken public interest in a change of party rule.

We are not sure but that the answer quoted in the summary of the Civic Federation's report, "Why worry? How much larger a majority than 7,000,000 did President Coolidge want in 1924?" has not in it the essence of the explanation of electoral apathy. A full vote can never be brought out unless there is some sharp point at issue between the voters of the respective parties. There can never be needed two conservative parties in a nation, and if, therefore, the whole tendency of public thought is toward conservatism, the one party which has pre-empted that particular policy profits, and voters, accepting its triumph as a matter of course, stay away from the polls.

Doubtless in time there will again arise national issues upon which the parties in the United States will be sharply and honestly divided. Such an issue might present itself next year should either party place itself unreserv-edly on the side of the overthrow of the pro-hibition law. At present that seems improb-able, yet it is the only issue now in sight upon which the people are clearly divided. Perhaps the best answer to the Civic Federation's question might have been that the reaction—tem-porary of course—against democracy, plus the general satisfaction with the administration of affairs in the United States, explains the apathy in national elections. As to local elections this rule does not apply, and for a striking illustration of what may be accomplished when sharply divergent personalities or theories come before the people, we may point to the recent mayoralty election in Chicago with its unprecedented outpouring of voters.

#### Students in Industry

THERE is a growing interest among college. students in America in the problems of industry. With many of these undergraduates the challenge of industrial democracy is something more than a sociological abstraction. It is a great human adventure. That is why many of these students are donning overalls during the summer months, the vacation season. These young social crusaders are seeking first-hand information regarding the human and economic factors of American industry. They realize that the data, charts and opinions contained in textbooks present little more than mere surface conditions. Lacking industrial experience, they are unable to appraise in any comprehensive manner the ethical and moral values involved in the use of capital and the employment of labor. The Students in Industry Movement, now in its second year, aims to familiarize interested students with the prac-

tical needs of the present-day industrial society.

Many of the students who have enrolled in this movement are just now looking for jobs. They are entering industry as manual laborers. They are living on the wages and under the same social and economic conditions as their fellow workers. They are trying in this way to get the workingman's point of view. An effort is also made to understand the problems and the risks

Numbers of these students have gravitated toward the great industrial centers—New York, Chicago, Philadelphia, Cleveland, Detroit, Boston, St. Louis and Denver. Once or twice a week informal conferences will be held for the exchange and evaluation of experiences and to discuss the issues germane to the industries of which they are, for the time being, a part.

It is also planned to have competent business and labor leaders, social workers and economists, available to address these employed students and to be questioned by them. Just prior to the opening of the college year, a "Students in Industry Conference" will be held, similar to the one that was set up last year at Earlham College, in Richmond, Ind.

These young men and women are to be con-These young men and women are to be con-gratulated upon their strength of purpose and for the high motives that have prompted them to forgo the customary luxuries of a vacation season in order "to find out for themselves" the facts and conditions incident to one of our gravest social problems. It augurs well for the future of both Capital and Labor when students are able to lay aside for a time their textbook tools in order to take up and handle for themselves the implements with which the work of the world is being done. Calloused hands are just as essential to an understanding of industrial issues as are the carefully worded theories of the sociologist or the data charts of the economists. The Students in Industry Movement should go a long way toward establishing in the United States an unbroken industrial

#### The June Session of the Council

THE proceedings at Geneva during the June session of the Council of the League of Nations were remarkable mainly for the increased part played by a sort of self-consti-tuted committee of the Council which held private meetings, issued official communiqués and even gave itself the title of "conference" to distinguish it from the more regular body, which was made to play decidedly second fiddle by the semisocial gatherings of its rival. In so far as Geneva affords an opportunity for the foreign ministers of the powers to meet and settle their differences in private, the "tea-table method" of handling the affairs of Europe has much to be said for it. But, it is asked, why confine the amenities of this social intercourse always to the representatives of the same six countries when the Council has fourteen members, some of whom are at least as vitally interested in the problems under discussion as are the aristocratic six themselves, and probably

While the Council was discussing comparatively minor questions, or rather in the intervals of its discussions, the foreign ministers of the great powers assembled with certain of their colleagues on the Council at the headquarters of the British and French delegations to discuss the general situation in Europe. These meetings were advertised as conferences of the Locarno powers, to which Japan was admitted by virtue of its position on the Ambassadors'

The powers represented at these gatherings Great Britain, France, Germany, Italy, and Belgium, and the bulletins which they issued, although they gave little information, let it be understood that the political situation, not only in Europe but in the Far East, was discussed. It was no secret that the chief preoccupation of these conferences was the Russian question in all its bearings. It might have been thought that for this reason Poland and Rumania would have been admitted to the group, for any debate on Russia has a particular interest for them. But neither of these countries, nor Czechoslovakia, although both Poland and Czechoslovakia were signatories to treaties at Locarno, were admitted.

Other important questions were debated by the Locarno powers, and the differences between France and Germany concerning the last stages of German disarmament were solved in this way. This was all to the good. And no one could object to private conversations between the foreign ministers. But when the other members of the Council found themselves left, not only in the could but in the dark, they protested that the authority and prestige of the League of Nations were in danger. They protested, too, that the position of the Council as the trustee of the League and the central authority for the settlement of international affairs would be gradually undermined if the more powerful nations on the Council thus took the discussion of the more important issues out of its hand. For it was obvious that the Russian question not only overshadowed all others, but that it touched the interests of all concerned.

Similarly the other countries represented on the Council felt that they had a right to take part in the discussion on the German fortress question and the reduction of the French troops in the Rhineland. For no foreign question can properly be isolated from any other. The protest appeared to be a legitimate one, and more will be heard of it when the Assembly meets, for according to the Constitution of the League, it is the Council, and not any group of powers, which is responsible for the peace of Europe.

#### Aviation and the Railroads

THE recent wave of popular enthusiasm over the future possibilities of aviation focuses attention upon the potential competition which the railroads will face as the airplane continues to develop. It is a wise man who refrains from making a forecast of the direction which progress in aviation will take, for it is not impossible that another decade or score of years will see trains of airplanes, hauled by a "locomotive," all of which can be brought to earth at a central station in a city by means of inventions which will obviate the need of extensive landing fields.

Whether or not this is the case, however, there is small need for apprehension concerning the competition of airplanes with railroads. As an evidence of this, the automobile serves as a precedent. While the motorcar is causing the railroad passenger business to diminish constantly, it is, at the same time, resulting in an enormous volume of freight traffic, measured in terms of hundreds of thousands of carloads annually, not including the materials and supplies shipped to the manufacturing cities where automobiles are produced. The revenue from this business repays many times over the loss occasioned by the competition which the finished product furnishes when placed in service beside the railroad as a carrier of freight or passengers. A similar situation may result in

connection with airplanes. To railroad security holders, the question of greatest interest is net income which can be

converted into dividends, and the fact that the expansion of the motor industry has but served to swell the gross and net of railroad revenue lends credence to the thought that the development of air transport on a sound basis will like-wise be reflected in added prosperity to the rail lines. And just as the railroads have entered the motor transport field when the competition of the motor trucks and buses became too keen, so it is probable that they would circumvent too vigorous a competition by air, by establishing air lines themselves. In fact, one rail line, in changing its corporate status, provided for this eventuality by describing among its present or future activities the maintenance of air lines along its route.
Until airplanes can be constructed which can

carry more than a handful of passengers; the railroads need have little apprehension concerning competition from a passenger standpoint. And until the enormous costs of operation per mile flown by an airplane can be reduced, the latter is a negligible quantity as a competitor of the railroads in the handling of freight, due to the high charges which must be made. Railroad officers therefore conclude that in a passenger sense, the airplane will, for the present at least, attract only such passengers as are willing to pay a substantial sum for their transportation, and that the carriage of goods will be restricted to the express shipments of lightweight, expensive articles for which speed rather than a low transportation cost are the desideratum.

#### Professors, Students and Gifts

MERICAN professors will no doubt find in the news that Rumanian professors are now forbidden by the Government to receive gifts from students some cause for astonishment. Not because the American professor never receives such gifts, but because the happy event is too episodic to be regarded as characteristic of the higher education. Gifts are borne more lavishly to teachers in the public schools, and one such teacher often acquires an embarrassing wealth of handkerchiefs op neckties, which remain cherished, unused, and ever accumulating. One judges, however, that the gifts habitually received by Rumanian professors have been of greater value, though possibly, also, to be sure, the Rumanian professors have now so many handkerchiefs and neckties that they have themselves appealed to the Government to ban the custom.

"The professors," says this recent mandate, as report reaches American readers, "are strictly enjoined from receiving material things." The acceptance of any gift from a single student to a single professor is declared not only indelicate, but subject to discipline. The professor must refuse. Handkerchiefs and neckties are evidently included in the prohibition, for it specifies that even a flower is not to be accepted. The student, one decides, may bring a violet to decorate the classroom-but not to decorate a professor. The professor, presumably, may put the wolet on his desk in a glass of water—but he may not take it home with him. This applies to the high schools, colleges and universities. In the elementary schools, one is glad to think, "Teacher," in Rumania as in America, is still the

natural recipient of many handkerchiefs, neckties, flowers, and other innocent "material things." But not so, for various and quite sig-nedeant reasons, in the case of the universities and colleges.

Without casting any undue suspicions, however, it may be presumed that some professors in Rumania possibly feel incensed at the ruling. On the other hand, many more are probably well pleased to see the end of a practice that has become detrimental to the repute of their profession. The professors may even have helped instigate the reform, not to escape a continuous avalanche of flowers, handkerchiefs and neckties, but to get rid of applying to gift-bearing students a well-known classical quotation about gift-bearing Greeks. It would appear also that an aroused public disapproval is getting to work to improve a general condition that has incidentally invaded the higher walks of learning. Meantime, there is nothing in the ban to invalidate that ancient proverb: "A diligent scholar, and the master's paid."

#### Random Ramblings

The critics of American aeronautical develop may feel disturbed about the extent of its military air equipment, but the acclaim of the whole world attests the vigor and excellence of the technical skill and progress of American fliers and their machines.

The accord that is rapidly brushing aside differences at the Geneva naval disarmament conference is further evidence of the worth of patience and the effectiveness of good will. True peace can only be achieved through

Wonder how long it will be before news of transoceanic flights becomes relegated to one line under the heading, "Movements in the Air Lanes"?

Regardless of whether potatoes should be "peeled" or "pared," when cooked many persons enjoy them "paired." Rapid City, S. D., certainly has lived up to its name

When putting teeth into the laws, legislators should not omit the wisdom. In addition to other things a reigning hero often

Prince Edward Island drys have, paradoxically, swamped the wets. The nimble one wins at Wimbledon.

And now on to the South Pole.

#### Color Below!

OME Michael, come! Fly with me today, up, up, up through the clouds, way up into the solitude of blue, where we shall pause like a lark and survey the world! Find color!

Are you there, Michael boy? We are away, the ground

lets go, full branches wave quickly, the air parts and we pass into sky.

Where are we? asks Michael. I laugh, for I know; but it is the more fun not to know until there. Then I tell him we are over the northern end of Lake Constance, to the southwest of which water is Switzerland, to the north-east Germany. Michael is aware of our purpose, to search the world over for the daintiest touches of color on the earth's broad surface and put them, page by page, into

Where the waters are shallow they lie over mudbanks and turn dove-gray. Where the waters are only a little deeper, and where they wind around and about the gray lashes, they are rose. It is a rose of all roses, and such a tint as I have never from an airplane seen elsewhere. Rose and gray, and the sun kissing them both; woven strands moving eventually into the blue bosom of the lake.

Off again—so fast. This time above a valley on the northwest frontier of India, a little south of the Khyber

Pass, and just north of the hilltown Bannu. The white tape of road underneath us joins Bannu to Peshawar. Our valley is in the trough of tumbling mountains where the soil is red. The hills are brown, the mountain crevices black, and the soil is red. Harmony of Oriental tone.

Little black shark, swimming in diamond waters. Where are we now? questions the boy. Just over the extreme northern tip of the flat mangrove island of Andros, in the Bahama group. Never in all the seas is the whiteness of water so white. And the little shark—probably six feet ng—idles like a tadpole unconcernedly.
We proceed to Nassau even as the sunset westward

gathers the whole heavens in one gigantic embrace of scarlet and gold. It lasts not long, and the ocean below is a blue without depth until the bays by Nassau are reached Then the sands and the shoals and the grass of the sea bottom, and the shelving beaches, and lagoons in coral embedded, and the mass clusters of sea fan, pronounce

So the blue gives way to purple, to green, to lilac, to sapphire, to indigo, to black, to emerald, to amethyst, even to ocher, where a flash of sunlight strikes a flint of coral

in the water. And the palm trees wave, and the town peers out from pink-walled gardens filled with red and yellow

flowers.

Now we are where the rain is falling. On one wing tip only, for the other is under dry sky. A rainbow paints itself against the rain. It is gone, It is France. Above Cambrai. Up and we look below. We are at nearly 20,000 feet; under us, 16,000 feet away, are clouds,—a canopy reaching the circle of the horizon around. A basin of mother-of-pearl, and about it the cerulean tapestry of sky.

What a boy is this Michael, writing in his scrapbook where he is. Knows the ribbon with its bows is the Suez where he is. Knows the ribbon with its bows is the Suez Canal and its lakes. The Mediterranean is made of lapis nd the Gulf of Suez of jade, but the Suez Canal and its lakes are of less weighty substances; are composed of peacock feathers. So it seemed to us. The blue would be in the center and the green on the edges as the water approached the sands of the desert. Someone had scattered hosts of peacock feathers from the azure Mediterranean to the jade Gulf of Suez.

ranean to the jade Gulf of Suez.

Springtime fying about the Danube River, making shy advances to the fields on the northern bank just east of the capital of Slovakia, Bratislava. A chessboard of fields. Black loam, white blossoms, fresh green shoots, the crops and the soil fitting irregularly into the quaint, oblong patches. The Danube is a belt of cobalt sheen dividing these fields from the Hungarian grainlands southward.

One last flight, Michael, and enough for today, I remark. He is no end of a fellow, this Michael chap; believes there is a lot more color to look down and note down. But I tell him we will fly again and again. For do not the sweet birds fly, and hath man not the promise of dominion? But for a last glance at the color that can only be seen beneath one.

be seen beneath one.

This time the colors are more quiet, for it is evening again, and we are over the English Channel, close upon Dover. The white cliffs tramp into the waters, and the waters ripple in olive tints flecked with pink toward the distant coast of France. The white gulls wheel above the steamers and the harbor. The land is a sleepy land, breaking into tiny lights, and the sea to eastward is picking up the luminescence of the moon. The air has the softness of down, and the colors of land and sea and sky are in subdued pastel shades, gently, gently resting at

R. A. C.

the close of day.

And so is Michael.

#### The World's Great Capitals: The Week in Paris

EORGES CLEMENCEAU is always entertaining EORGES CLEMENCEAU is always entertaining, and it is almost impossible to spend an hour with him without gleaning many bons mots. He marked on one such occasion by saying that the publisher of his philosophic work was doubtful about its effect on the public. But he consoled himself by adding: "But then, happily, nobody will buy it." When one laughed at this boutade, Clemenceau confessed that he had invented the anecdote. He was asked what were his favorite bedside books. He replied: "I have none. I never read lying down. But the books which I like best are the classics—the old books whose writers thought before they put pen to paper." Among the moderns he praised Anatole France. Certainly there was a good deal of waste in his works and he had serious limitations. Zola was a brave man as well as a conscientious author, and Clemenceau admired him for his courageous attitude in the Dreyfus case.

as a conscientious author, and Clemenceau admired him for his courageous attitude in the Dreyfus case.

Paul Claudel he ranked with Mallarme—that is to say, he did not approve of obscurity. "When one writes in French it, should be to make oneself understood." And Paul Valery? asked the interlocutor. "Valery?" replied Clemenceau bluntly, "I do not know him." On politics the Tiger is as mute as ever, but he did remark: "One cannot liger is as mute as ever, but he did remark: "One cannot be content with the state in which the politicians have placed France." Will he write his Memoirs? "Never," he said emphatically. "During the war I did my duty in displacing various people, because it was a question of the salvation of my country. But to relate the history of their defections would be cruel. Moreover, history composes itself slowly and almost automatically."

The centenary of the French railroads was commemo rated at Saint-Etienne. This first railroad was opened in 1827 between Saint-Etienne and the little Gallo-Roman town of Andrézieux. The line was twenty kilometers in length. It was constructed so that horses might draw more easily wagons filled with coal, but steam boilers were invented and the new means of locomotion was put into operation. André Tardieu unveiled the monument to Marc Seguin, regarded as the inventor of the tubular boiler. When one remembers what has since been accomplished wonders what progress will have been made when the centenary of aviation is celebrated.

+ + + A great cavalcade along the Paris Boulevards announced the coming of summer. Firmin Gémier organized this re-markable procession. There were knights riding on richly caparisoned steeds and beautiful coaches drawn by gray horses, with outriders bearing "Parisette, Queen of the City." There was a guard of honor formed of the Dragons Villars. There was an old stagecoach with passengers recalling the early part of the nineteenth century. There was a galaxy of crinoline-clad ladies. There was the first motorcar and various vehicles illustrated the development of street locomotion. There were the donkeys of Sceaux-Robinson, and the high bicycle of forty years ago, and the vanishing fiacre with its picturesque cocher, and there were the taxis which were sent, filled with soldiers, to reinforce the army of the Marne. There were hundreds of symbolic chariots, and generally it was agreed that Paris has never had such a successful, interesting, and artistic fête. Those who had supposed that these traditional cortéges were declining in popularity were certainly shown to

Myron T. Herrick, the American Ambassador, has added his name to the list of members of the Guild of Former Pipe-Organ Pumpers in Paris. He was eligible because he had pumped the organ in his youth at Wellington, O. It is understood that this is Loft No. 2, Loft No. 1 having been established last year in New York. Its aims are stated to be "to perpetuate the memory of this decadent but honorable profession that has been swept into obsolescence by modern electrical methods, and to secure a just recognition to which the profession is entitled in the annals of musical progress."

The annual exhibit of students work has been shown by the New York School of Fine and Applied Art in the Place des Vosges. Each department of interior architecture and decoration, theater and costume design, advertisement and illustration, is represented. There are sets of measured architectural drawings of the most beautiful rooms in Paris, Versailles, Fontainebleau, Compiègne, and Malmaison, as well as documents relating to Italian cities. The seventeenth, eighteenth and nineteenth centuries of French styles are shown, sometimes in origin turies of French styles are shown, sometimes in original combinations, and the modern movement has received its share of attention. Taste and practicality are the keynotes. More than 150 graduates are already creating rooms in American homes and in Canada. The director of the school is William M. Odom. One feature of the exhibits—the Pageant of the Place des Vosges—consists of sketches of great personages connected with the Place from Henri II to Rachel.

A date is marked in the history of electric traction by the inauguration of the electrically driven train from Bor-

deaux to Hendaye on the Spanish frontier. The Compagnie du Midi early recognized the advantages of electrification, because it is far from the coal centers, but in trification, because it is far from the coal centers, but in compensation is in a district which abounds in hydraulic resources. The region of the Pyrenees has been employed to yield water-engendered electricity. As long ago as 1902 a convention was drawn up with the state for an electric line from Villefranche to Bourg-Madame. The program calls for the electrification of 950 kilometers. It is plain that there is great economy to be effected all round, while greater speeds can be attained and there is no smoke. Nor are there sparks, which have frequently set on fire the forests of the Landes.

#### Letters to The Christian Science Monitor

Brief communications are welcomed, but The Christian Science Most-for Editorial Regret must remain gole judge of their satishility, and this Board does not Rold itself or this nessegaper responsible for the facts or opinions presented. Anonymous letters are destroyed unread.

#### A Reliable Guide

TO THE CHRISTIAN SCIENCE MONITOR:

I was alone in Paris, and having decided to visit Switzerland, the thought occurred, why not work out a trip through advertisements in The Christian Science Monitor! The Swiss Supplement had been published a few weeks before this time and it was sought as a guide to places of A tourist agency that advertised in the Moniton was

visited to get some information about the travel end, and a sixty-day tourist ticket was bought for a very moderate rate, the route selected being Paris to Geneva, to Lausanne to Berne, to Lucerne, to Zurich, to Basle, back to Paris by different route from the one taken from Paris. From the advertisements in the Monitor, pensions were

selected in each place and letters were written to each city making tentative inquiries. These were followed by further notifications as to the exact day, date, and time of scheduled arrival of train.

In several cases, the answers to letters telling of tim of arrival were most explicit in directions as to what street car to take to reach the house. Some said, "It will not be necessary to take a taxi, as we are right on the street-car track." Others included directions to give the taxi drivers, and in every instance the traveler was met by the hostess (one could not call her "landlady") with a genuine and unmistakable welcome.

I was more than satisfied with the accommodation in every instance and found that my hostesses several times told me of particularly interesting places to visit and just how best to get there. It was through such a suggestion that I visited Madame de Staël's home at Le Coppet. A glorious ride on Lake Geneva on a day that Mont Blanc could be seen without her veil of clouds.

All these delightful hostesses speak English, and through their courtesy one gets such splendid directions as to how to see what is best worth seeing in the city. Also, when one's particular bent is learned, a personal interest is taken in guiding one to where it can best be indulged. All through the tour there was a feeling of being per-

sonally conducted by The Christian Science Monitor, one familiar with the care with which advertisers are invited to publish in this paper has a feeling of having their needs selected and presented to them. As one person once remarked to me, "The advertisements in that paper are rather 'hand-picked,' aren't they?" Well, yes, one might call them that, especially the pensions at which I stopped in Switzerland.

CATHERINE MITCHELL TALIAFERRO. Brooklyn, N. Y.

#### President Coolidge's Flag Day Message To THE CHRISTIAN SCIENCE MONITOR:

One can scarcely read President Coolidge's Flag Day proclamation without a feeling of pride and patriotism

Our flag symbolizes all that is included in our Consti-Our flag symbolizes all that is included in our constitution. If we show respect to the flag we show respect to the Constitution. We cannot pledge allegiance to our flag and not include allegiance to the Constitution also. If we disobey the laws of our country we dishonor the flag.

Do the editors of our daily newspapers and magazines, and men of prominence who voice their opinions through these periodicals realize what an influence they have over a majority of the general public either for good or bad? Should not these public writers endeavor to encourage obedience to the law and not violation of it? To criticize our Constitution and the laws of the land is to encourage disobedience thereto.

Our flag as honored by our protective forces and our Boy Scouts does not stand for that "liberty" which allows men to become slaves to a habit that is not only a dis-

men to become slaves to a habit that is not only a disgrace to a man and the flag, but also tends to destroy the
moral and spiritual standard for which our flag stands.

The "high ideals of which our flag is the visible symbol," must be instilled into the hearts of the people if the
people are to truly honor our flag as such.
